payments external debt net foreign assets and international reserve positions although these play an important role in the way such shocks could impinge on them This is a matter for concern since the multilateral system still lacks mechanisms for orderly resolution of financial crises with international dimensions Playing with Fire provides an empirical account of deeper integration of EDEs into the global financial system and discusses its implications for stability and growth focusing on the role of policies in the new millennium in both EDEs and the United States and Europe Competition on the Internet Gintarė Surblytė, 2014-11-24 Undeniably widespread and powerful as it is the Internet is not almighty it can reach as high as the skies cloud computing but it cannot escape competition Yet safeguarding competition in the network of networks is not without challenges not only are competitive processes in platform based industries complex so is competition law analysis The latter is often challenged by the difficulties in predicting the outcome of competition in particular in terms of innovation Do the specific competition law issues in a digital environment presuppose a reconsideration of competition law concepts and their application Can current competition law tools be adjusted to the rush pace of dynamic industries To what extent could competition law be supplemented by regulation is the latter a foe or rather an ally This book provides an analysis of recent developments in the most relevant competition law cases in a digital environment on both sides of the Atlantic the EU and the US and assesses platform competition issues from a legal as well as an economic point of view **Competition Law** Richard Whish, David Bailey, 2015 Definitive and clear authoritative and comprehensive the stand alone resource on competition law for students and practitioners written by the leading academics in the field This eighth edition addresses key developments including the Enterprise and Regulatory Reform Act 2013 with an increased emphasis on intellectual property

**The Search for Entrepreneurship** Simon Bridge, 2016-12-08 Since the 1980s governments have often sought to encourage entrepreneurship on the assumption that it creates small businesses as the primary drivers of job creation As a result entrepreneurship has become a valid subject for academic research attracting extensive funding Despite this explosion of scholarship there is no accepted model of how entrepreneurship operates or even a commonly accepted definition of what it is Simon Bridge posits that this is because entrepreneurship has been studied based on the false assumption that it exists as a specific discrete identifiable phenomenon operating in accordance with consistent predictable rules So this misdirected search has produced more questions than answers Accepting that entrepreneurship as we have conceived it does not exist could lead to new and valuable insights into what the different forms of entrepreneurship are and how they might be influenced Scholars advanced students and policy makers will find this a thought provoking insight into the misconceptions of entrepreneurship

*Streaming and Copyright Law* Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions
