

Physical Sciences 101 - Kinematics Weighting

Proposed:

We want your input on the principle that we propose to use as a basis for weighting the exam.

Our objective:

Design an exam that
 assesses basic concepts and related applications and analysis
 of kinematic concepts
 weighting fairly.

Our constraints:

1. Physics is a 2 module course.

2. Topics of interest, independent of the subject:

3. Grade 12 level

We will provide the material for all the topics and I will be looking at the final results of the exam.

4. The exam will be divided into 2 parts. The first part will be a multiple choice exam and the second part will be a written exam. The first part will be a multiple choice exam and the second part will be a written exam. The first part will be a multiple choice exam and the second part will be a written exam.

$$\% \text{ difference} = \frac{\text{actual value} - \text{theoretical value}}{\text{actual value}} \times 100\%$$

5. The exam will be divided into 2 parts. The first part will be a multiple choice exam and the second part will be a written exam.

6. Using the data, we will calculate the average and standard deviation. The data will be used to calculate the average and standard deviation. The data will be used to calculate the average and standard deviation.

7. The data will be used to calculate the average and standard deviation. The data will be used to calculate the average and standard deviation. The data will be used to calculate the average and standard deviation.
