International Conference on Mechanism Science and Control Engineering (MSCE 2014) ,2014-09-02 The aim of MSCE 2014 is to provide a platform for researchers engineers and academicians as well as industrial professionals to present their research results and development activities in mechanism science and control engineering It provides opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration MSCE2014 is conducted to all the researchers engineers industrial professionals and academicians who are broadly welcomed to present their latest research results academic developments or theory practice Topics of interest include but are not limited to Mechanism theory and Application Mechanical control and Automation Engineering Mechanical Dynamics Materials Processing and Control Instruments and Vibration Control It is of great pleasure to see the delegates exchanging ideas and establishing sound relationships on the conference *The New ABCs of Research* Ben Shneiderman,2016-02-04 The problems we face in the 21st century require innovative thinking from all of us Be it students academics business researchers of government policy makers Hopes for improving our healthcare food supply community safety and environmental sustainability depend on the pervasive application of research solutions The research heroes who take on the immense problems of our time face bigger than ever challenges but if they adopt potent guiding principles and effective research lifecycle strategies they can produce the advances that will enhance the lives of many people These inspirational research leaders will break free from traditional thinking disciplinary boundaries and narrow aspirations They will be bold innovators and engaged collaborators who are ready to lead yet open to new ideas self confident yet empathetic to others In this book Ben Shneiderman recognizes the unbounded nature of human creativity the multiplicative power of teamwork and the catalytic effects of innovation He reports on the growing number of initiatives to promote more integrated approaches to research so as to promote the expansion of these efforts It is meant as a guide to students and junior researchers as well as a manifesto for senior researchers and policy makers challenging widely held beliefs about how applied innovations evolve and how basic breakthroughs are made and helping to plot the course towards tomorrow s great advancements **Commercial Aircraft Propulsion and Energy Systems Research** National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Aeronautics and Space

Engineering Board, Committee on Propulsion and Energy Systems to Reduce Commercial Aviation Carbon Emissions, 2016-08-09 The primary human activities that release carbon dioxide CO₂ into the atmosphere are the combustion of fossil fuels coal natural gas and oil to generate electricity the provision of energy for transportation and as a consequence of some industrial processes Although aviation CO₂ emissions only make up approximately 2.0 to 2.5 percent of total global annual CO₂ emissions research to reduce CO₂ emissions is urgent because 1 such reductions may be legislated even as commercial air travel grows 2 because it takes new technology a long time to propagate into and through the aviation fleet and 3 because of the ongoing impact of global CO₂ emissions Commercial Aircraft Propulsion and Energy Systems Research develops a national research agenda for reducing CO₂ emissions from commercial aviation This report focuses on propulsion and energy technologies for reducing carbon emissions from large commercial aircraft single aisle and twin aisle aircraft that carry 100 or more passengers because such aircraft account for more than 90 percent of global emissions from commercial aircraft Moreover while smaller aircraft also emit CO₂ they make only a minor contribution to global emissions and many technologies that reduce CO₂ emissions for large aircraft also apply to smaller aircraft As commercial aviation continues to grow in terms of revenue passenger miles and cargo ton miles CO₂ emissions are expected to increase To reduce the contribution of aviation to climate change it is essential to improve the effectiveness of ongoing efforts to reduce emissions and initiate research into new approaches
