The Math Myth Andrew Hacker, 2010-05-25 A New York Times bestselling author looks at mathematics education in America when it's worthwhile and when it's not Why do we inflict a full menu of mathematics algebra geometry trigonometry even calculus on all young Americans regardless of their interests or aptitudes While Andrew Hacker has been a professor of mathematics himself and extols the glories of the subject he also questions some widely held assumptions in this thought provoking and practical minded book Does advanced math really broaden our minds Is mastery of azimuths and asymptotes needed for success in most jobs Should the entire Common Core syllabus be required of every student Hacker worries that our nation's current frenzied emphasis on STEM is diverting attention from other pursuits and even subverting the spirit of the country Here he shows how mandating math for everyone prevents other talents from being developed and acts as an irrational barrier to graduation and careers He proposes alternatives including teaching facility with figures quantitative reasoning and understanding statistics Expanding upon the author's viral New York Times op ed *The Math Myth* is sure to spark a heated and needed national conversation not just about mathematics but about the kind of people and society we want to be Hacker's accessible arguments offer plenty to think about and should serve as a clarion call to students parents and educators who decry the one size fits all approach to schooling Publishers Weekly starred review

Reskilling America Katherine S. Newman, Hella Winston, 2016-04-19 From Katherine Newman award winning author of No Shame in My Game and sociologist Hella Winston a sharp and irrefutable call to reenergize this nation's long neglected system of vocational training After decades of offshoring and downsizing that have left blue collar workers obsolete and stranded the United States is now on the verge of an industrial renaissance But we don't have a skilled enough labor pool to fill the positions that will be created which are in many cases technically demanding and require specialized skills A decades long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system Touted as a progressive egalitarian institution providing opportunity even to those with the greatest need the American secondary school system has in fact deepened existing inequalities We can do better argue acclaimed sociologists Katherine Newman and Hella Winston Taking a page from the successful experience of countries like Germany and Austria where youth unemployment is a mere 7% they call for a radical reevaluation of the idea of vocational training long discredited as an instrument of tracking The United States can prepare a new high performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education By doing so we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers we will make the American Dream accessible to all

Crimes of the Educators Samuel Blumenfeld, Alex Newman, 2025-01-17 Utopian dictators like Stalin Hitler Pol Pot and Mao are criminals genocidal psychopaths who have killed more human beings in the last hundred years than any other ideologues in history They don't limit their murder to individuals but to entire nations In the United States another form of utopians the progressives have tried to destroy traditional America by strategically dumbing down her people America's future is being crippled on purpose in order to fundamentally transform the nation its values and its system of government Laid out a century ago by progressive luminary John Dewey the fruits of his schemes are plain to see today Dewey got rid of the traditional intensive phonics method of instruction and imposed a look say sight or whole word method that forces children to read English as if it were Chinese The method is widely used in today's public schools which is a major reason there are so many failing public schools that cannot teach children the basics This can only be considered a blatant form of child abuse American author and veteran educator Samuel Blumenfeld and journalist Alex

Newman have taken on the public education establishment as never before and exposed it for the de facto criminal enterprise it is Crimes of the Educators reveals how the architects of America's public school disaster implemented a plan to socialize the United States by knowingly and willingly dumbing down the population a mission closer to success than ever as the Obama administration works relentlessly to nationalize K 12 schooling with Common Core The whole word method of teaching children to read introduced by John Dewey and colleagues in the early twentieth century and which permeates Common Core is a significant cause of dyslexia among students Public education's war against religion the great American math disaster promotion of death education and the government's plan to lower standards for all so no one is left behind is destroying the logic reasoning and overall educational prowess of America's next generation According to the Program for International Student Assessment which collects test results from 65 countries for its rankings In reading students in 19 other locales scored higher than U S students In science 22 education systems scored above the U S In mathematics 29 nations and other jurisdictions outperformed the United States Journalist Henry Mencken said it best in 1924 when he wrote that the aim of public education is to reduce as many individuals as possible to the same safe level to breed and train a standardized citizenry to put down dissent and originality It is time to hold the Department of Education accountable for the crimes of the educators
