

MONITORING GLOBAL DEVELOPMENT PROGRESS

1

Projections show that the global poverty rate may have fallen to single digits in 2015. Yet, the number of poor remains high.

2

While income poverty fell rapidly during the MDG-era, a large unfinished agenda remains for the SDGs with respect to non-income goals.

3

An increasing share of the world's poor reside in Sub-Saharan Africa, requiring increased focus on this continent.

4

In most countries, income growth of the bottom 40% has been positive – accelerated growth is needed to meet poverty and shared prosperity objectives.

5

The 2009 crisis led to a sharp fall in growth but less so for low-income countries which, since 2009, have enjoyed the fastest growth.

6

While in some high-income countries the bottom 40 percent is middle class, in low-income countries they are extremely poor, pointing to different policy challenges in different settings.
