Swarm Intelligence for Resource Management in Internet of Things Aboul Ella

Hassanien, Ashraf Darwish, 2020-08-18 Internet of Things IoT is a new platform of various physical objects or things equipped with sensors electronics smart devices software and network connections IoT represents a new revolution of the Internet network which is driven by the recent advances of technologies such as sensor networks wearable and implantable mobile devices networking and cloud computing technologies IoT permits these the smart devices to collect store and analyze the collected data with limited storage and processing capacities Swarm Intelligence for Resource Management in the Internet of Things presents a new approach in Artificial Intelligence that can be used for resources management in IoT which is considered a critical issue for this network The authors demonstrate these resource management applications using swarm intelligence techniques Currently IoT can be used in many important applications which include healthcare smart cities smart homes smart hospitals environment monitoring and video surveillance IoT devices cannot perform complex on site data processing due to their limited battery and processing However the major processing unit of an application can be transmitted to other nodes which are more powerful in terms of storage and processing By applying swarm intelligence algorithms for IoT devices we can provide major advantages for energy saving in IoT devices Swarm Intelligence for Resource Management in the Internet of Things shows the reader how to overcome the problems and challenges of creating and implementing swarm intelligence algorithms for each application Examines the development and application of swarm intelligence systems in artificial intelligence as applied to the Internet of Things Discusses intelligent techniques for the implementation of swarm intelligence in IoT Prepared for researchers and specialists who are interested in the use and integration of IoT and cloud computing technologies

Sustainable Cloud and Energy Services Wilson

Rivera, 2017-09-20 This is the first book entirely devoted to providing a perspective on the state of the art of cloud computing and energy services and the impact on designing sustainable systems Cloud computing services provide an efficient approach for connecting infrastructures and can support sustainability in different ways For example the design of more efficient cloud services can contribute in reducing energy consumption and environmental impact The chapters in this book address conceptual principles and illustrate the latest achievements and development updates concerning sustainable cloud and energy services This book serves as a useful reference for advanced undergraduate students graduate students and practitioners interested in the design implementation and deployment of sustainable cloud based energy services Professionals in the areas of power engineering computer science and environmental science and engineering will find value in the multidisciplinary approach to sustainable cloud and energy services presented in this book *Internet of Things*

Qusay F. Hassan, Atta ur Rehman Khan, Sajjad A. Madani, 2017-12-15 Internet of Things Challenges Advances and Applications provides a comprehensive introduction to IoT related technologies and common issues in the adoption of IoT on a large scale It surveys recent technological advances and novel solutions for challenges in the IoT environment Moreover it

provides detailed discussion of the utilization of IoT and its underlying technologies in critical application areas such as smart grids healthcare insurance and the automotive industry The chapters of this book are authored by several international researchers and industry experts This book is composed of 18 self contained chapters that can be read based on interest Features Introduces IoT including its history common definitions underlying technologies and challenges Discusses technological advances in IoT and implementation considerations Proposes novel solutions for common implementation issues Explores critical application domains including large scale electric power distribution networks smart water and gas grids healthcare and e Health applications and the insurance and automotive industries The book is an excellent reference for researchers and post graduate students working in the area of IoT or related areas It also targets IT professionals interested in gaining deeper knowledge of IoT its challenges and application areas

6G Connectivity-Systems, Technologies, and Applications Ramjee Prasad,Dnyaneshwar Shriranglal Mantri,Sunil Kumar Pandey,Albena Dimitrova Mihovska,2024-08-09 This book covers need for 6G connectivity arising from the pursuit of higher data speeds ultra low latency massive IoT connectivity enhanced spectral efficiency and the facilitation of new and transformative applications By addressing these drivers and expectations 6G aims to revolutionize wireless communication opening up a realm of possibilities for industries societies and individuals Technological improvements and evolutions are required beyond fifth generation 5G networks for wireless communications as well as in the industry where the involvement of collaborative robots COBOT will satisfy the personal needs of human beings as and when required leading to human machine interactions A considerable amount of effort has been devoted both in industry and academia towards the performance modelling evaluation and prediction of convergent multi service heterogeneous future generation networks such as 6G Technical topics discussed in the book include Network security and attacks 6G applications and Industry 5 0 Human centric interface Green computing in wireless cellular networks Next generation networks IOT Cloud Computing Big Data etc

Big Data Analytics in Astronomy, Science, and Engineering Shelly Sachdeva,Yutaka Watanobe,2024-04-26 This book constitutes the proceedings of the 11th International Conference on Big Data Analytics in Astronomy Science and Engineering BDA 2023 which took place in Aizu Japan during December 5 7 2023 The 19 full papers included in this book were carefully reviewed and selected from 55 submissions They were organized in topical sections as follows Data management and visualization data science architectures and systems data science and applications and cyber systems and information security

Prospects of Artificial Intelligence in the Environment Ajitanshu Vedrtam,Kevin P. Wyche,Balendra V. S. Chauhan,Sneha Verma,2025-07-19 This book gives readers insight into the state of the art use of artificial intelligence for the environment It encompasses most of the significant facets of current breakthroughs in the fields of conceptions methodologies resources and leading artificial intelligence solutions for the environment This book presents research at the forefront on applications of artificial intelligence in combating climate change natural hazards and textile dyeing pollution water pollution for forecasting

assessing air quality trends and air pollution monitoring It explains how machine learning can prove to be an efficient technique to forecast the consumption of energy and how AI can be effective for renewable energy systems Research in this book widens its scope to present the problems opportunities and directives for the application of AI systems in engine exhaust prediction One of the new and interesting things explored is to provide and predict the rate of decay of human lung tissue due to Particulate Matter exposure with the help of AI in this book Likewise the book opens its scope to various environmental problems and focuses on giving the best solutions with an application of artificial intelligence this feature makes this book an indispensable guide for environmental scientists and AI researchers of all levels The book is written comprehensively so that engineering professionals programmers environmentalists graduates postgraduates and researchers from beginning intermediate level to advance level can be enlightened

Human Resource Information Systems

Richard D. Johnson, Kevin D. Carlson, Michael J. Kavanagh, 2025-01-27 Human Resource Information Systems Basics Applications and Future Directions is a one of a kind book that provides a thorough introduction to the field of Human Resource Information Systems HRIS and shows how organizations today can leverage HRIS to make better people decisions and manage talent more effectively Unlike other texts that overwhelm students with technical information and jargon this revised Sixth Edition offers a balanced approach to dealing with HR issues and IT IS issues by drawing from experts in both areas Authors Richard D Johnson Kevin D Carlson and Michael J Kavanagh cover the latest research and developments in information security artificial intelligence cloud computing social media and HR analytics Numerous examples best practices discussion questions and case studies make this book the most student friendly and current in the market

The Home of the Future Sinan Küfeoğlu, 2021-07-01 This book presents an in depth study to show that a sustainable future urban life is possible To build a safer and more sustainable future as humankind we would like to use more renewable energy increase energy efficiency reduce our carbon and water footprints in all economic sectors The increasing population and humans ever increasing demand for consumption pose another question whether the world's resources are sufficient for present and future generations Fair access to water energy and food is the objective for all In line with the United Nations Sustainable Development Goals scientists researchers engineers and policymakers worldwide are working hard to achieve these objectives To answer all these challenges we would like to introduce the core of Smart Cities of the future the building block of the future's urban life Open Digital Innovation Hub ODIH ODIH will serve as the Home of the Future a fully digitalised and smart self sustaining building that answers all the motivation we highlight here In ODIH we introduce a living space that produces its water energy and food by minimising carbon and water footprints thanks to the Internet of Things Artificial Intelligence and Blockchain technologies It will also serve as an open innovation environment for start ups and entrepreneurs who wish to integrate their solutions into the infrastructure of ODIH and test those in real time We believe this will be a true open innovation test bed for new business models

Disruptive Artificial Intelligence and Sustainable Human Resource

Management Anamika Pandey,Balamurugan Balusamy,Naveen Chilamkurti,2023-12-14 It is well established that every organization is founded with a specific purpose and goals Virtually all business organizations obtain measurements and metrics dealing with outcomes and results However what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their survival and sustainability Thus the question arises what exactly makes the organizations sustainable and thriving in an ever changing environment There are several examples of companies like Faber Castell Bank of Ireland Chivas DuPont and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era Thus it is important for the organization to pay equal attention to its three bottom lines i e people profit and planet for its sustainability which not only meet the needs of the present generation but should have a futuristic approach as well In the present era organizations are adopting a new normal working dynamic and coping with the post pandemic situations to sustain themselves in the business environment Technology plays a significant role in this new working dynamic and cutting edge technologies like machine learning artificial intelligence blockchain ChatGPT Internet of Things and much more effectively facilitate human functioning at work The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies It highlights the interconnection among the three bottom line sustainable approaches for the growth and development of the organization Topics discussed in this book include Disruptive Technologies and HR Sustainability Convergence of Innovative Technologies HR and Organizational Growth Triple bottom line Sustainability for HRM Business oriented Talent analytics and HR Sustainability Role of Leadership in sustainable HRM practices **Identity Management**

for Internet of Things Parikshit N. Mahalle,Poonam N. Railkar,2022-09-01 The Internet of Things is a wide reaching network of devices and these devices can intercommunicate and collaborate with each other to produce variety of services at any time any place and in any way Maintaining access control authentication and managing the identity of devices while they interact with other devices services and people is an important challenge for identity management The identity management presents significant challenges in the current Internet communication These challenges are exacerbated in the internet of things by the unbound number of devices and expected limitations in constrained resources Current identity management solutions are mainly concerned with identities that are used by end users and services to identify themselves in the networked world However these identity management solutions are designed by considering that significant resources are available and applicability of these identity management solutions to the resource constrained internet of things needs a thorough analysis Technical topics discussed in the book include Internet of Things Identity Management Identity models in Internet of Things Identity management and trust in the Internet of Things context Authentication and access control Identitymanagement for Internet of Things contributes to the area of identity management for ubiquitous devices in the

Internet of Things It initially presents the motivational factors together with the identity management problems in the context of Internet of Things and proposes an identity management framework Following this it refers to the major challenges for Identitymanagement and presents different identity management models This book also presents relationship between identity and trust different approaches for trust management authentication and access control *Advanced Communication Systems and Information Security* Mostafa Belkasmi,Jalel Ben-Othman,Cheng Li,Mohamed Essaaidi,2020-11-05 This book constitutes selected papers of the Second International Conference on Advanced Communication Systems and Information Security ACOSIS 2019 held in Marrakesh Morocco in November 2019 The 10 full papers and 10 short papers were thoroughly reviewed and selected from 94 submissions The papers are organized accroding to the following topical sections wireless communications and services vehicular communications channel coding construction of error correcting codes intrusion detection techniques wireless and mobile network security applied cryptography **Internet of Things, Artificial Intelligence and Blockchain Technology** R.Lakshmana Kumar,Yichuan Wang,T. Poongodi,Agbotiname Lucky Imoize,2021-09-02 This book explores the concepts and techniques of IoT AI and blockchain Also discussed is the possibility of applying blockchain for providing security in various domains The specific highlight of this book is focused on the application of integrated technologies in enhancing data models better insights and discovery intelligent predictions smarter finance smart retail global verification transparent governance and innovative audit systems The book allows both practitioners and researchers to share their opinions and recent research in the convergence of these technologies among academicians and industry people The contributors present their technical evaluation and compare it with existing technologies Theoretical explanation and experimental case studies related to real time scenarios are also included This book pertains to IT professionals researchers and academicians working on fourth revolution technologies **Research Anthology on Convergence of Blockchain, Internet of Things, and Security** Management Association, Information Resources,2022-07-08 The rise of technology has proven to be a threat to personal data cyberspace protection and organizational security However these technologies can be used to enhance the effectiveness of institutional security Through the use of blockchain and the internet of things IoT organizations may combat cybercriminals and better protect their privacy The Research Anthology on Convergence of Blockchain Internet of Things and Security describes the implementation of blockchain and IoT technologies to better protect personal and organizational data as well as enhance overall security It also explains the tools applications and emerging innovations in security and the ways in which they are enhanced by blockchain and IoT Covering topics such as electronic health records intrusion detection and software engineering this major reference work is an essential resource for business leaders and executives IT managers computer scientists hospital administrators security professionals law enforcement students and faculty of higher education librarians researchers and academicians **Software Quality: Methods and Tools for Better Software and Systems** Dietmar
