Cisco Emergency Responder Serviceability Configuration Overview

Note

The following information addresses SNMP Management. For information about SNMP setting for phone tracking, refer to [Set Up SNMP Connections](#).

Emergency Responder supports SNMP V1/V2C and V3. You can use the Serviceability web interface to configure SNMP V1/V2C (Community String and Notification Destination) and SNMP V3 (User and Notification Destination).

Each SNMP version has security models and security levels. Users are assigned to groups that are defined by a security model and specified security levels. Each group also has a defined security access level to a set of MIB objects for reading and writing, which are known as views. The switch has a default view (all MIB objects) and defaults groups defined for SNMP V1 and V2C security models. SNMP V3 provides additional security features that cover message integrity, authentication, and encryption. In addition, SNMP V3 controls user access to specific areas of the MIB tree.

The following sections describe how to configure SNMP V1/V2C and V3.

Serviceability Tools

The following sections describe the Emergency Responder Serviceability tools.

First Responder's Guide to Abnormal Psychology William I. Dorfman, Lenore E. Walker, 2007-12-27 This book gives readers critical insights into the human impact of extreme trauma and the various levels of mental impairment suffered by both victims and survivors Renowned trauma experts William Dorfman and Lenore Walker give this book immediate relevance through the use of real life examples from a wide range of crisis situations They have also deliberately minimized research citations within the text for greater readability **Wildland Fire Incident Management Field Guide** NWCG, 2014-06-06 The Wildland Fire Incident Management Field Guide is a revision of what used to be called the Fireline Handbook PMS 410 1 This guide has been renamed because over time the original purpose of the Fireline Handbook had been replaced by the Incident Response Pocket Guide PMS 461 As a result this new guide is aimed at a different audience and it was felt a new name was in order **HAZMAT Guide for First Responders** Michael L. Madigan, 2017-05-19 The goal of this book is to help train hazmat response teams and other responders in disaster training techniques and planning The book will also help define and sharpen training plans and assumptions Focusing on lessons learned from real world experiences during actual disasters the book will help to establish a well trained professional 1st responder individuals and teams Such lessons are emphasized so that planners and responders learn to anticipate how

their community is likely to react under real disaster conditions and plan accordingly *First Responder's Guide to Agricultural Chemical Accidents* Charles R. Foden, Jack L. Weddell, 2018-02-06 First Responder's Guide to Agricultural Chemical Accidents provides emergency safety and health information for 452 toxic and hazardous products. These products frequently used by pest exterminators and farmers include those insecticides, pesticides, rodenticides, herbicides, and fertilizers commonly transported on highways and by rail carriers. The book lists products alphabetically and includes the manufacturer and telephone number, chemical identification, physical properties, hazard ratings, neutralizing agents, when known, fire fighting agents, special warnings, evacuation distances, protective clothing, health hazard information, and emergency first aid for exposure. This important information allows any First Responder to establish a safe plan of action without having to reference the library of chemical books normally carried by a Hazardous Materials Emergency Response Team. HERT First Responder's Guide to Agricultural Chemical Accidents is an essential reference that provides critical hazardous materials data for personnel at fire departments, law enforcement agencies, and emergency medical agencies. The book will also be useful for business or individuals that store, sell, or use agricultural chemicals. Terrorism, Asymmetric Warfare, and Weapons of Mass Destruction Anthony H. Cordesman, 2001-11-30 There is a wide spectrum of potential threats to the U S homeland that do not involve overt attacks by states using long range missiles or conventional military forces Such threats include covert attacks by state actors state use of proxies independent terrorist and extremist attacks by foreign groups or individuals and independent terrorist and extremist attacks by residents of the United States These threats are currently limited in scope and frequency but are emerging as potentially significant issues for future U S security In this comprehensive work Cordesman argues that new threats require new thinking and offers a range of recommendations from expanding the understanding of what constitutes a threat and bolstering Homeland defense measures to bettering resource allocation and improving intelligence gathering and analysis No pattern of actual attacks on U S territory has yet emerged that provides a clear basis for predicting how serious any given form of attack might be in the future what means of attack might be used or how lethal new forms of attack might be As a result there is a major ongoing debate over the seriousness of the threat and how the U S government should react This work is an invaluable contribution to that debate
