Competing Models of Linguistic Change Ole Nedergaard Thomsen, 2006-10-25 The articles of this volume are centered around two competing views on language change originally presented at the 2003 International Conference on Historical Linguistics in the two important plenary papers by Henning Andersen and William Croft The latter proposes an evolutionary model of language change within a domain neutral model of a generalized analysis of selection whereas Henning Andersen takes it that cultural phenomena could not possibly be handled i.e. observed described understood in the same way as natural phenomena These papers are models of succinct presentation of important theoretical framework The other papers present and discuss additional models of change e.g. invisible hand processes system internal models functional and cognitive models Most papers do not subscribe to the evolutionary model instead they focus on functional factors in the selection and propagation of variants as opposed to factors of code efficiency or on cognitive and pragmatic perspectives Several papers are inspired by the late Eugenio Coseriu and by Henning Andersen's theories on language change In particular the volume contains articles proposing interesting grammaticalization studies and extended models of grammaticalization The clear presentation of important and competing approaches to fundamental questions concerning language change will be of high interest for scholars and students working in the field of diachrony and typology The languages referred to in the papers include Cantonese the Chukotko Kamchatkan languages Danish English Eskimo languages German Norwegian Russian Spanish and Swedish

Personality and Neurosurgery J. Brihaye, L. Calliauw, F. Loew, R. van den Bergh, 2012-12-06 The human personality is inextricably bound up with among other things the function of the central nervous system Diseases and malfunctions of the brain head injuries and neurosurgical operations can all result in permanently altered behaviour patterns This interrelation between brain and behaviour is most clearly demonstrated in cases involving functional neurosurgery and severe traumatic lesions Despite the fact that this interrelation represents an everyday challenge to the neurosurgeon it is a question which receives less attention than it deserves in neurosurgical meetings Given the scope and complexity of this topic it is not possible to cover every aspect of it here hence discussion is limited to the impact on personality of injuries language epilepsy and psychosurgery However before considering the medical aspects it was deemed necessary to try and arrive at a definition of personality This question was discussed by a number of philosophers representing various perspectives Their diversity of viewpoints and conceptions greatly enriched the discussions

Every Day with Jesus Daily Bible Selwyn Hughes, 2013-10-01 Many people begin a new year with a commitment to read the Bible through in 365 days These intentions are good but the reading plan they choose may not be the most effective one for reaching the goal Every Day with Jesus Daily Bible manages to overcome many difficulties of reading the Bible straight through in a year From day one the plan provides rich variety in the readings Each day includes a selection from The Old Testament The New Testament Psalms Proverbs There's also a devotion from beloved pastor Selwyn Hughes that is linked to one of the four readings for the

day Those who follow this plan will read the entire Bible in a year Reading the four different Scripture portions each day has the benefit of introducing many readers to passages they have never explored And this is done in a context where encountering the four different Scripture selections together at the same time will yield new insights into God s Word

fundamental features of human subjectivity as it developed in early modern philosophy Udo Thiel presents a critical evaluation of these features as they were conceived in the seventeenth and eighteenth centuries He explains the arguments of thinkers such as Descartes Locke Leibniz Wolff and Hume as well as their early critics followers and other philosophical contemporaries and situates them within their historical contexts Interest in the issues of self consciousness and personal identity is in many ways characteristic and even central to early modern thought but Thiel argues here that this is an interest that continues to this day in a form still strongly influenced by the conceptual frameworks of early modern thought In this book he attempts to broaden the scope of the treatment of these issues considerably covering more than a hundred years of philosophical debate in France Britain and Germany while remaining attentive to the details of the arguments under scrutiny and discussing alternative interpretations in many cases
