Michael Heimert,T.J. Michaelson,2018-10-26 The pricing of goods services intangible property and financial instruments within a multi divisional organization particularly in regard to cross border

transactions has emerged as one of the most contentious areas of international tax law. This is due in no small measure to the rise of transfer pricing regulations as governments seek to stem the flow of their tax revenue from their jurisdictions. This thoroughly practical work provides guidance on an array of critical transfer pricing issues. The guide's relevance is further enhanced by the inclusion of country chapters covering domestic transfer pricing issues in a variety of key national jurisdictions.

Tax Reform with the 20/20 Tax James C. Tanner, 2015-12-02 Many books have been written about tax reform but none offer the pragmatic and understandable approach that you'll find in this treatise filled with a nonpartisan set of solutions to fix an antiquated and indecipherable tax system. James C. Tanner, a certified public accountant with more than four decades of experience, explores how we can create a fair and logical tax framework by rethinking income exclusions, exemptions, deductions, credits, tax brackets, capital gains, and other tax alternatives; reform tax expenditures including health insurance and medical costs, home mortgage and other interest deductions, retirement plan deductions, charitable donations, and capital gains on assets sold and transferred; lower the tax rates for most individual and corporate taxpayers while making our US companies more competitive with their foreign counterparts. Tanner also outlines how historical decisions and legislative proposals led to our current tax laws under the premise that we can't fix them without understanding why they were created in the first place. For those who want to participate in the national debate on federal tax reform, it begins with a firm understanding of the system and the practical proposals in *Tax Reform with the 20/20 Tax*.

Service Provision and Rural Sustainability Greg Halseth, Sean Markey, Laura Ryser, 2018-10-25 Access to quality services and community infrastructure are vital parts of supporting sustainable and resilient rural and small town places. Renewing outdated infrastructure and supporting the delivery of services in rural communities present significant challenges from the constrained fiscal and policy realities of the 21st century. Drawing upon contributors from five Organization for Economic Cooperation and Development (OECD) countries, this book describes innovative service delivery and community infrastructure models that are appropriate to the contemporary rural and resource-dependent regions of developed economies. The examples show that an entrepreneurial approach to service delivery and infrastructure provision by local organizations and governments is needed. Critical economic and community development supports are crucial to assist creative and innovative sets of solutions that work for small communities. Chapters in this book argue that community development foundations for resilient rural and small town communities and regions must be co-constructed and co-delivered in partnership by both local and senior government actors in terms of both policy and committed resources. This volume will be extremely valuable for students, scholars, and community development practitioners exploring policy-making, government initiatives, and community service provision in rural and small town places.

Tax Authority Advice and the Public Stephen Daly, 2020-04-02 There is now almost universal acceptance that tax law is overly complex and indeterminate, and yet there has to date been no comprehensive assessment of the role of the tax authority in the current arrangement. If the legislation and case law offer few

immediate answers to the taxpayer then the role of Her Majesty's Revenue Customs HMRC in advising taxpayers becomes more apparent. This monograph contends that the provision of advice by HMRC is desirable by virtue of the rule of law and it follows that any such advice should be correct, clear, accessible and reliable. Additionally, there should exist some means of scrutinising the advice in order to check that it satisfies these criteria. Tax Authority Advice and the Public explores this view of HMRC's role in tax collection. It explains the deficiencies in the current system in this light, highlighting the pitfalls for taxpayers and practitioners as well as the potential remedies. Finally, the book assesses potential reforms which could be adopted in order to alleviate existing problems. A timely and ambitious work, this book is essential reading for practitioners and academics interested in the interaction between tax administration and public law.
