

Mentor's role Essay Example

The aim of this assignment is to critically analyse the learning environment and to discuss the mentor's role in supporting learners during their clinical placement, acknowledging mentors' accountability throughout the whole process. Mentorship is a very complex, integral role which has been described by Kinnell and Hughes (2010) as a process of transferring knowledge, skills and attitudes from mentors to students, facilitating learning in order to ensure their fitness for practice.

The level of support and guidance that students receive from suitably qualified practitioners, able to assess their competence, is the key to successful practice learning.

Price (2004) suggests that the learning environment needs to be continually monitored by clinical staff and audited in order to maintain quality and to provide appropriate support for learners. An effective placement for students is perceived according to their own personal goals and aspirations. The context of practice for this review is a Respiratory Centre, which is very well resourced clinical area with highly experienced members of staff who deliver care for patients with acute or chronic respiratory conditions. The Centre encompasses the Outpatients Department, Procedures suite, Physiology Department and a Day Ward.

The staff have specialised knowledge and skills, being able to perform a variety of investigative procedures and a multitude of therapies guided by the National Services Framework for Respiratory Health and Wellbeing (2009). The Matrons and Senior Sisters display very good leadership skills (Copee 2008), creating and preserving a learning environment, motivating and encouraging the members of staff to reach their full potential by ensuring various continuing prof
