Poetry & Commons Daniel Eltringham, 2022-05-13 Winner of the ASLE UKI Book Prize 2023 The commons and enclosure are among the most vital ways of thinking about poetry today posing urgent ecological and political questions about land and resource ownership and use Poetry Commons is the first study to read postwar and contemporary poetry through this lens by putting it in dialogue with the Romantic experience of agrarian dispossession Employing an innovative transhistorical structure the book demonstrates how radical Anglophone poetries since 1960 have returned to the enclosure of the commons in response to political and ecological crises It identifies a commons turn in contemporary lyric that contests the new enclosures of globalized capital and resource extraction In lucid close readings of a rich field of experimental poetries associated with the British Poetry Revival as well as from Canada and the United States it analyses a landscape poetics of enclosure in relationship with Romantic verse Canonical Romantic poetry by Wordsworth and Clare is understood through the fine grain textures of the period s vernacular and radical verse and discourse around enclosure which the book demonstrates contain the seeds of neoliberal political economy Engaging with the work of Anne Lise Fran ois and Anna Tsing Poetry Commons theorizes commoning as marking out subsistence rhythms of resource which articulate plural irregular and tentative relations between human and nonhuman lifeworlds Nature and Literary Studies Peter Remien, Scott Slovic, 2022-08-04 Nature and Literary Studies supplies a broad and accessible overview of one of the most important and contested keywords in modern literary studies Drawing together the work of leading scholars of a variety of critical approaches historical periods and cultural traditions the book examines nature s philosophical theological and scientific origins in literature as well as how literary representations of this concept evolved in response to colonialism industrialization and new forms of scientific knowledge Surveying nature s diverse applications in twenty first century literary studies and critical theory the volume seeks to reconcile nature s ideological baggage with its fundamental role in fostering appreciation of nonhuman being and agency Including chapters on wilderness pastoral gender studies critical race theory and digital literature the book is a key resource for students and professors seeking to understand nature s role in the environmental humanities **Place in Literature** Roberto Maria Dainotto, 2000 Since the 1840s when Victorian England emerged into the modern era and industrial cities became the new cultural centers regionalist literature has posited itself as

an aesthetic alternative to nationalist culture Yet what differentiates regionalism's claims of authenticity derived from blood and soil from those of nationalism Through close readings and theoretical elaborations Roberto M Dainotto reveals the degree to which regionalism mimics nationalism in valorizing ethnic purity He interprets regionalism not as a genre in the pastoral tradition but as a rhetorical trope a way of reading in which regionalism figures as the other against a historical process that disrupts the organic wholeness of place Dainotto traces the genealogy of the idea of place in literature examining European texts from Victorian England to Fascist Italy He finds for example in Thomas Hardy's *The Return of the Native* a virtual thesaurus of regionalist commonplaces Elizabeth Gaskell's *North and South* mediates between Madame de Stal's privileging of the sophisticated north and Jean Jacques Rousseau's nostalgia for the naive south The regionalism of the Sicilian philosopher Giovanni Gentile exhibits a deep longing for the humanities as they define Italy and Western culture Dainotto concludes with a close look at the rhetoric of Nazism and Fascism dramatizing the convergence of regionalist aesthetics and nationalist ideology in Italy and Germany between the two World Wars

Wordsworth and the Green Romantics Lisa Ottum, Seth T. Reno, 2016-05-05 Situated at the intersection of ecocriticism affect studies and Romantic studies this collection breaks new ground on the role of emotions in Western environmentalism Recent scholarship highlights how traffic between Romantic era literature and science helped to catalyze Green Romanticism Closer to our own moment the affective turn reflects similar cross disciplinary collaboration as many scholars now see the physiological phenomenon of affect as a force central to how we develop conscious attitudes and commitments Together these trends offer suggestive insights for the study of Green Romanticism While critics have traditionally positioned Romantic Nature as idealized and illusory Romantic representations of nature are in fact ambivalent scientifically informed and ethically engaged They often reflect writers efforts to capture the fleeting experience of affect raising urgent questions about how nature evokes feelings and what demands these sensations place upon the feeling subject By focusing on the affective dimensions of Green Romanticism *Wordsworth and the Green Romantics* advances a vision of Romantic ecology that complicates scholarly perceptions of Romantic Nature as well as popular caricatures of the Romantics as naive nature lovers This collection will interest scholars and students of Romanticism eighteenth and nineteenth century British literature ecocriticism affect studies and those who work at the intersection of literature and science

William Wordsworth and the Ecology of Authorship Scott Hess, 2012 In *William Wordsworth and the Ecology of Authorship* Scott Hess explores Wordsworth's defining role in establishing what he designates as the ecology of authorship a primarily middle class nineteenth century conception of nature associated with aesthetics high culture individualism and nation Instead of viewing Wordsworth as an early ecologist Hess places him within a context that is largely cultural and aesthetic The supposedly

universal Wordsworthian vision of nature Hess argues was in this sense specifically male middle class professional and culturally elite factors that continue to shape the environmental movement today **Green Writing** James

Naturalists, Early Environmentalists Dr Dewey Hall,2014-10-28 In his study of Romantic naturalists and early environmentalists Dewey W Hall asserts that William Wordsworth and Ralph Waldo Emerson were transatlantic literary figures who were both influenced by the English naturalist Gilbert White In Part 1 Hall examines evidence that as Romantic naturalists interested in meteorology Wordsworth and Emerson engaged in proto environmental activity that drew attention to the potential consequences of the locomotive s incursion into Windermere and Concord In Part 2 Hall suggests that Wordsworth and Emerson shaped the early environmental movement through their work as poets turned naturalists arguing that Wordsworth influenced Octavia Hill s contribution to the founding of the United Kingdom s National Trust in 1895 while Emerson inspired John Muir to spearhead the United States National Parks movement in 1890 Hall s book traces the connection from White as a naturalist turned poet to Muir as the quintessential early environmental activist who camped in Yosemite with President Theodore Roosevelt Throughout Hall raises concerns about the growth of industrialization to make a persuasive case for literature s importance to the rise of environmentalism **The Song of the Earth** Jonathan

Bate,2000-09-18 In the first ecological reading of English literature Jonathan Bate traces the distinctions among nature culture and environment and shows how their meanings have changed since their appearance in the literature of the eighteenth century **Byron's Nature** J. Lord Byron 1789 1824 claiming him as one of the most important ecological poets in the British Romantic tradition Using political ecology post humanist theory new materialism and ecological science the book shows that Byron s major poems Childe Harold s Pilgrimage the metaphysical dramas and Don Juan are deeply engaged with developing a cultural ecology

that could account for the co creative synergies in human and natural systems and ground an emancipatory ecopolitics and ecopoetics scaled to address globalized human threats to socio environmental thriving in the post Waterloo era In counterpointing Byron s eco cosmopolitanism to the localist dwelling praxis advocated by Romantic Lake poets Byron s Nature seeks to enlarge our understanding of the extraordinary range depth and importance of Romanticism s inquiry into the meaning of nature and our ethical relation to it **Green Writing** James C. McKusick,2010 **Romantic Ecocriticism** Dewey W. Hall,2016 Romantic Ecocriticism Origins and Legacies is unique due to its rare assemblage of essays which has not appeared within an edited collection before Romantic Ecocriticism is distinct because the essays in the collection develop transnational and transhistorical approaches to the proto ecological early environmental aspects in British and American Romanticism First the edition s transnational approach is evident through transatlantic connections such as but are not limited to comparisons among the following writers William Wordsworth William Howitt and Henry D Thoreau John Clare and Aldo Leopold Charles Darwin and Ralph W Emerson Second the transhistorical approach of Romantic Ecocriticism is evident in connections among the following writers William Wordsworth and Emily Bronte Thomas Malthus and George Gordon Byron James Hutton and Percy Shelley Erasmus Darwin and Charlotte Smith Gilbert White and Dorothy Wordsworth among others Thus Romantic Ecocriticism offers a dynamic collection of essays dedicated to links between scientists and literary figures interested in natural history **Song of the Earth** John R. Dann,Jonathan Bate,2000-06-01 In the brilliantly engaging style that characterised The Genius of Shakespeare Jonathan Bate has written a series of compelling pieces on the link between literature and the environment and why poetry matters in the new millennium In fascinating detail Bate explains how words like culture and environment have evolved since the writing of Jane Austen Thomas Hardy and the Romantics to the present day **Bucolic Ecology** Timothy Saunders,2008-10-16 By adopting differing approaches to the physical world as astronomy geography topography landscape and ecology this work offers an account of the Eclogues that emphasises their range and complexity
