Perceiving Truth and Value Markus Mühling, David Andrew Gilland, Yvonne Förster, 2019-11-11 The theme of this volume is the question of value perception It is discussed from different philosophical psychiatric theological and anthropological perspectives The thesis that unites all the papers is the recognition that we live in a relational dynamic world in which we primarily perceive and that to dissolve values from facts is fundamentally misleading both in theory as in life The contributions are the outcome of an energetic conference in 2016 where the problems at stake were rigorously discussed The results are presented here and they have an explicit order and are strictly related It opens with basic questions and observations then critical opinions and objections come into play after which the outline of a larger theory of value perception is presented and at the end some concrete examples from material practices are drawn

it sheds on how and whether international commercial arbitrators have hitherto justified the trust States have placed in them regarding the protection of the public interests but also in the practical solutions it offers arbitrators faced with issues of bribery and corruption this deeply researched book equips arbitration practitioners and arbitration institutions with a hitherto lacking in depth analysis on the question of sua sponte investigation It also provides invaluable insights on how this issue might affect the future legitimacy and expansion of this dispute settlement mechanism Outside the field of arbitration the book also provides jurists legal scholars in house counsel for companies doing transnational business and public officials with highly enlightening perspectives on the interaction between international commercial arbitration and public interests
