World Literature Decentered Ian

Almond,2021-07-13 What would world literature look like if we stopped referring to the West Starting with the provocative premise that the West is ten percent of the planet World Literature Decentered is the first book to decenter Eurocentric discourses of global literature and global history not just by deconstructing or historicizing them but by actively providing an alternative Looking at a series of themes across three literatures Mexico Turkey and Bengal the book examines hotels melancholy orientalism femicide and the ghost story in a series of literary traditions outside the West The non West the book argues is no fringe group or token minority in need of attention on the contrary it constitutes the overwhelming majority of this world

On Anthologies Jeffrey R. Di Leo,2004-01-01 Over the course of the past twenty five years anthologies have shifted from playing a relatively minor role in academic culture to a position of dominance The essays in this collection explore the significant intellectual economic political pedagogical and creative resonance of anthologies through all levels of academic life They show that anthologies have consequences and are grounded in commitments Striving to articulate these consequences and commitments is a priority in higher education today Most of the contributors to this volume are editors of anthologies and they draw on personal experiences to provide a rare glimpse into the economics and logic of anthology publication Their essays illustrate the ways in which editing an anthology involves negotiation and compromise between intellectual ideal and realistic practice *On Anthologies* includes discussion of a wide range of anthologies used and produced by teachers and scholars Though the emphasis is on literature and theory anthologies the insights in this volume speak to professionals in all areas of academic life Collectively these essays establish the foundation for continuing critical analysis of anthology production and consumption in all disciplines

Classical World Literatures Wiebke Denecke,2014

Ever since Karl Jaspers's axial age paradigm there have been a number of influential studies comparing ancient East Asian and Greco Roman history and culture However to date there has been no comparative study involving multiple literary traditions in these cultural spheres This book compares the dynamics between the younger literary cultures of Japan and Rome and the literatures of their venerable predecessors China and Greece How were writers of the younger cultures of Rome and Japan affected by the presence of an older reference culture whose sophistication they admired even as they anxiously strove to assert their own distinctive identity How did they tackle the challenge of adopting the reference culture's literary genres rhetorical refinement and conceptual vocabulary for writing texts in different languages and within distinct political and cultural contexts *Classical World Literatures* captures the striking similarities between the ways early Japanese authors wrote their own literature through and against the literary precedents of China and the ways Latin writers engaged and

contested Greek precedents But it also brings to light suggestive divergences that are rooted in geopolitical linguistic sociohistorical and aesthetic differences between early Japanese and Roman literary cultures Proposing a methodology of deep comparison for the cross cultural comparison of premodern literary cultures and calling for an expansion of world literature debates into the ancient and medieval worlds Classical World Literatures is both a theoretical intervention and an invitation to read and re read four major literary traditions in an innovative and illuminating light
