Dealstorming Tim Sanders, 2016 The bestselling author of *Love Is the Killer App* unveils a methodology that sales managers and account executives can use to solve their team's toughest problems by combining the wisdom and creativity of everyone who has a stake in the sale. B2B sales reps often find that their deals get stuck at a crucial point in the decision making process. This book is Tim Sanders's guide to breaking through the resistance and getting the deal unstuck using a scalable repeatable process that he calls Dealstorming. By including a diverse group of individuals in the organization who has a stake in the sale, questioning existing assumptions and channeling the collective experience of the group, sales teams can uncover creative solutions to closing otherwise impossible deals. In Sanders's experience as a sales executive and consultant, utilizing this process has led to a stunning 70 percent close ratio. Take for example the way Alyssa Wichman of CareerBuilder used dealstorming to break a deadlock with staffing firm Allegis. When she found out that Allegis was sponsoring a golf tournament to raise money for their favorite nonprofit, she and her team sat down to come up with ways to meet the Allegis executives, there going so far as to take over manning a beer cart on the course to speak with the execs on the ninth hole. They were impressed she'd gone to such lengths to have a few minutes with them, so they agreed to a meeting the following week.

Carbon Queen Maia Weinstock, 2022-03-01 The life of trailblazing physicist Mildred Dresselhaus, who expanded our understanding of the physical world. As a girl in New York City in the 1940s, Mildred Millie Dresselhaus was taught that there were only three career options open to women: secretary, nurse, or teacher. But sneaking into museums, purchasing three-cent copies of *National Geographic*, and devouring books on the history of science ignited in Dresselhaus a passion for inquiry. In *Carbon Queen*, science writer Maia Weinstock describes how, with curiosity and drive, Dresselhaus defied expectations and forged a career as a pioneering scientist and engineer. Dresselhaus made highly influential discoveries about the properties of carbon and other materials and helped reshape our world in countless ways, from electronics to aviation to medicine to energy. She was also a trailblazer for women in STEM and a beloved educator, mentor, and colleague. Her path wasn't easy. Dresselhaus's Bronx childhood was impoverished. Her graduate adviser felt educating women was a waste of time. But Dresselhaus persisted, finding mentors in Nobel Prize-winning physicists Rosalyn Yalow and Enrico Fermi. Eventually, Dresselhaus became one of the first female professors at MIT, where she would spend nearly six decades. Weinstock explores the basics of Dresselhaus's work in carbon nanoscience accessibly and engagingly, describing how she identified key properties of carbon forms, including graphite, buckyballs, nanotubes, and graphene, leading to applications that range from lighter, stronger aircraft to more energy-efficient and flexible electronics.

Global Perspectives on Critical Architecture Gevork Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect's role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect's theorization of his/her own design strategies seem increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses questions such as Is architecture a conservative cultural product servicing a given producer-consumer system Should architecture's affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture's infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts
