

NY'S Making Connections Lab Questions

1. As an extension of the lab activity *Making Connections*, a biology teacher asked students to brainstorm variables other than exercise that would affect heart rate. The best explanation for the observations that the heart rates of 5 students were higher after lunch is

C) the students all had varying physical fitness levels and consumed different amounts of protein.
D) the students were all the same gender and age.

3. A student is opening and closing clothespins as part of a lab activity. The student begins to experience muscle fatigue, and the rate at which the student is opening and closing the clothespins slows.
