Lateralization and cognitive systems Sebastian Ocklenburg, Christian Beste, Onur Gunturkun, Marco

Hirnstein, 2015-02-24 Left right asymmetries of structure and function are a common organization principle in the brains of humans and non human vertebrates alike While there are inherently asymmetric systems such as the human language system or the song system of songbirds the impact of structural or functional asymmetries on perception cognition and behavior is not necessarily limited to these systems For example performance in experimental paradigms that assess executive functions such as inhibition planning or action monitoring is influenced by information processing in the bottom up channel Depending on the type of stimuli used one hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom up channel We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems Therefore it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception cognition and behavior in the broadest sense Flood Reconstruction Jürgen

Herget, 2024-10-22 Floods are among the most common and consequential natural disasters on Earth occurring in all natural areas at all times Yet they often surprise us with their unexpected magnitude and the damage they cause Terms like century and millennium floods quickly become widespread but what do we really know about the floods of the past How can we truly classify events like the Mississippi flood of 1993 the Elbe flood of 2002 or the Pakistan flood of 2010 Have such floods occurred before or are they unprecedented perhaps even consequences of ongoing climate change To answer these questions we must look into the past However river level records are often limited in duration rarely extending back more than a hundred years and many regions lack any measured values at all Nonetheless floods have left their marks These marks may exist in the form of historical records and descriptions which vary in extent across different cultural contexts In addition to historical records natural indicators like deposited sediments or erosion traces provide valuable information about past flood levels This is particularly important for prehistoric periods and for regions without dense settlements and related gauges These investigations lead to further questions about maximum flood levels and the earliest recorded observations This book addresses these questions by exploring the reconstruction of floods from both historical and prehistoric times It explains and discusses methods and results for beginners with diverse backgrounds in disciplines such as earth sciences hydrology history and engineering Extensive and carefully selected reference lists offer access to additional information **Metaphor in**

Communication, Science and Education Francesca Ervas, Elisabetta Gola, Maria Grazia Rossi, 2017-08-07 This collection of papers presents some recent trends in metaphor studies that propose new directions of research on the embodied cognition perspective The overall volume in particular shows how the embodied cognition still remains a relevant approach in a multidisciplinary research on the communicative side of metaphors by focusing on both comprehension processes in science as well as learning processes in education Monetary Theory and Policy, fourth edition Carl E. Walsh, 2017-05-12

The new edition of a comprehensive treatment of monetary economics including the first extensive coverage of the effective lower bound on nominal interest rates This textbook presents a comprehensive treatment of the most important topics in monetary economics focusing on the primary models monetary economists have employed to address topics in theory and policy Striking a balance of insight accessibility and rigor the book covers the basic theoretical approaches shows how to do simulation work with the models and discusses the full range of frictions that economists have studied to understand the impacts of monetary policy For the fourth edition every chapter has been revised to improve the exposition and to reflect recent research The new edition offers an entirely new chapter on the effective lower bound on nominal interest rates forward guidance policies and quantitative and credit easing policies Material on the basic new Keynesian model has been reorganized into a single chapter to provide a comprehensive analysis of the model and its policy implications In addition the chapter on the open economy now reflects the dominance of the new Keynesian approach Other new material includes discussions of price adjustment labor market frictions and unemployment and moral hazard frictions among financial intermediaries References and end of chapter problems allow readers to extend their knowledge of the topics covered Monetary Theory and Policy continues to be the most comprehensive and up to date treatment of monetary economics not only the leading text in the field but also the standard reference for academics and central bank researchers

Energy Security and Development B. Sudhakara Reddy, Sergio Ulgiati, 2015-02-05 This volume provides a systematic framework for energy suppliers policy makers academics students and all others interested in energy security and analyzes key issues concerning energy security and sustainability with the help of a wealth of data While sustainability is the broadest objective energy security is an important part of it at the global national and societal levels The development of a sustainable long term solution to meeting the world s energy needs is a defining issue of our time since central global challenges that the world faces poverty alleviation climate change and environmental degradation are directly linked to energy security The contributions cover key issues in sustainable energy and illustrate that the insecurity of a majority of countries owes to internal factors which have more to do with market forces inefficient technologies lack of institutions environmental insecurity pricing mechanisms etc and less to do with the international situation The links between energy and development are both direct and indirect Directly energy provides several services and utilities to maintain human well being and also does so indirectly through stakeholders This volume addresses both the direct and indirect links and provides sustainable alternatives helping readers to better grasp the resilience of both socio economic and resource sub systems in the process The issues affecting energy supply and demand including technology portfolios environmental considerations and consumer attitudes are thoroughly discussed One of the critical questions that arises is how to facilitate energy investment The investment climate and the key issues involved are analyzed including the capital flows with reasonable and stable investment frameworks timely decision making by governments and open markets The broad objective of the volume is to

foster a deeper understanding of the concept of energy security and to identify the methods of analysis policy initiatives and future research needed to generate a balanced pattern of energy use and mitigate its impact on humanity and the environment

Promoting Healthy Aging Across the Lifespan Elena Carrillo-Alvarez, Miriam Rodriguez-Monforte, Jordi Vilaró, Katherine Simone McGilton, 2024-12-26 Worldwide there is a generalized trend toward aged societies Between 2015 and 2050 the proportion of the world's population over 60 years will nearly double from 12% to 22% As life expectancy continues to increase and natality rates lower not only the composition of countries will change but also its health landscape However an increased life expectancy does not necessarily mean a healthy life In most high income countries more than 20% of those years are lived in ill health due to chronic conditions caused by non communicable diseases which compromises functional ability and well being key components of healthy aging In this way not only people's lives but also societal structures are being affected Based on the life course approach to healthy aging aging starts from conception In this regard the promotion of healthy aging requires preventive strategies that enhance capacities during growth and development maintain them for as long as possible after maturity and slow down their rate of decline Moreover considering healthy aging across the lifespan entails focusing on different factors life opportunities and choices that might significantly influence health status lifestyle as well as health and social inequalities in older age and challenges the focus of most research on the topic which exclusively investigates the effect of influences operating in the later stages of life

The Coherence of EU Free Movement Law Niamh Nic Shuibhne, 2013-08-29 Presenting a critical analysis of the Court of Justice's jurisprudence on EU free movement rights this book explains the drivers behind the fragmentation of internal market law It argues that the Court has a responsibility to articulate coherent framework principles applicable in national law but also requires greater support from Member States

The Alexander Romance: History and Literature Richard Stoneman, Krzysztof Nawotka, Agnieszka Wojciechowska, 2018-07-31 The Alexander Romance is a difficult text to define and to assess justly From its earliest days it was an open text which was adapted into a variety of cultures with meanings that themselves vary and yet seem to carry a strong undercurrent of homogeneity Alexander is the hero who cannot become a god and who encapsulates the desires and strivings of the host cultures The papers assembled in this volume which were originally presented at a conference at the University of Wrocław Poland in October 2015 all face the challenge of defining the Alexander Romance Some focus on quite specific topics while others address more overarching themes They form a cohesive set of approaches to the delicate positioning of the text between history and literature From its earliest elements in Hellenistic Egypt to its latest reworkings in the Byzantine and Islamic Middle East the Alexander Romance shows itself to be a work that steadily engages with such questions as kingship the limits of human and Greek nature and the purpose of history The Romance began as a history but only by becoming literature could it achieve such a deep penetration of east and west

The Mechanics' Magazine and Journal of Engineering, Agricultural Machinery, Manufactures and Shipbuilding ,1861 **Digital Business**

Analysis Fredrik Milani, 2019-01-25 This book frames business analysis in the context of digital technologies. It introduces modern business analysis techniques including a selection of those in the Business Analysis Body of Knowledge BABOK by the International Institute of Business Analysis IIBA and exemplifies them by means of digital technologies applied to solve problems or exploit new business opportunities. It also includes in depth case studies in which business problems and opportunities drawn from real world scenarios are mapped to digital solutions. The work is summarized in seven guiding principles that should be followed by every business analyst. This book is intended mainly for students in business informatics and related areas and for professionals who want to acquire a solid background for their daily work. It is suitable both for courses and for self study. Additional teaching materials such as lecture videos, slides, question bank, exams and seminar materials are accessible on the companion web page.
