Cleaning Up Dan Zuberi, 2013-09-20 To cut costs and maximize profits hospitals in the United States and many other countries are outsourcing such tasks as cleaning and food preparation to private contractors In *Cleaning Up* the first book to examine this transformation in the healthcare industry Dan Zuberi looks at the consequences of outsourcing from two perspectives its impact on patient safety and its role in increasing socioeconomic inequality Drawing on years of field research in Vancouver Canada as well as data from hospitals in the U S and Europe he argues that outsourcing has been disastrous for the cleanliness of hospitals leading to an increased risk of hospital acquired infections a leading cause of severe illness and death as well as for the effective delivery of other hospital services and the workers themselves Zuberi's interviews with the low wage workers who keep hospitals running uncover claims of exposure to near constant risk of injury and illness Many report serious concerns about the quality of the work due to understaffing high turnover poor training and experience inadequate cleaning supplies and on the job injuries Zuberi also presents policy recommendations for improving patient safety by reducing the risk of hospital acquired infection and ameliorating the work conditions and quality of life of hospital support workers He makes the case that hospital outsourcing exemplifies the trend towards low road service sector jobs that threatens to undermine society's social health as well as the physical health and well being of patients in health care settings globally

Vakulabharanam, 2018-12-07 This volume studies the outcomes of the two way flow of investments and people between China and India and Southeast Asia These cross border flows have led to new settlements in Southeast Asia from which new outlooks have emerged among locally born generations that have given rise to new forms of solidarity and identification The advent of new generations of ethnic Chinese and Indians in Southeast Asia with no ties to China or India has spawned important debates about identity shifts which have not been registered by government leaders in Southeast Asia China and India as reflected in policy statements and investment patterns Identity changes are assessed in forms where they best manifest themselves in social life and in business ventures forged or unsuccessfully nurtured through tie ups involving foreign and domestic capital A state society distinction is employed to determine how the governments of these rapidly developing countries envision development through state intervention as well as with the employment of highly entrepreneurial ethnic groups and the outcomes of this on their societies and on their economies The chapters were originally published as a special issue in The Round Table **Climate Change and Sustainable Cities** Hugo

Priemus, Simin Davoudi, 2016-04-08 Climate change has demonstrated perhaps more than any other environmental concerns the complexities of the human nature interrelationship and the need for embedding a far greater environmental consciousness into our social values and norms A drastic reduction in global greenhouse gas emissions requires a transition to low carbon cities This demands a better understanding of the interactions between social technical and spatial processes which constitute cities The aim of this book is to explore these interactions and urge urban planners and other built environment professionals to revisit some of their traditional concepts methods and ways of thinking about what constitutes a good city and according to whose priorities The book brings together nine contributions ranging from broad overviews to sector specific analysis paying particular attention to the role of urban planning Contributors cover climate change mitigation and adaptation deal with different scales of analysis ranging from international and European to national and city perspectives and discuss a range of policy sectors including housing transport energy sea level rise as well as pathways for climate policy implementation The diversity of the contributions is itself a reflection of the multitude of climate change concerns that preoccupy researchers policy makers and practitioners This book was published as a special issue of European Planning Studies *Producer Services in China* Anthony Yeh, Fiona Yang, 2013-02-11 In the past three decades China has

experienced an unprecedented pace of economic and urban development. Its economy is now transforming from one based on manufacturing industries towards the producer services with the importance of these services in the national and regional economy being recognized by economists and policy makers alike. With growing demand and policy support, producer services are expected to expand rapidly, leading to a new wave of economic and urban development in China. This groundbreaking volume is one of the first to address questions related to the development of these services in China. The contributions explore a wide range of associated topics including the characteristics of the growth of producer services and how this is related to China's economic and urban transition, the distribution of these services amongst Chinese cities as well as drawing comparison between producer service development in China and Western counterparts. This volume also discusses the dynamics of the development of these services in China and how the political economic embeddedness of China has shaped the development of producer services. Finally, the consequences of this growth and how the economy and urban space have changed in response is explored as well as the challenges Chinese cities face in moving towards a service economy and how this can inform future public policies. This volume addresses the pressing need to understand the economic and urban changes in post industrial China to allow appropriate strategies and policies to be formulated to facilitate future development in China. The text is rich with statistical data and diagrams providing original contributions and a cutting edge overview. This timely publication will be of interest to upper level undergraduates, postgraduates and researchers interested in China Urban Studies and Economic Development. Urban Transformational Landscapes in the City-Hinterlands of Asia Debnath Mookherjee, George M. Pomeroy, Le Thi Thu Huong, 2023-05-16. In the context of mounting challenges stemming from a rapid transformation of the urban regional landscapes in many Asian countries, this book highlights a multifaceted array of issues that increasingly engage the academic and planning communities in search of viable solutions to complex problems facing us. Even though cities continue to dominate development studies, urbanization of Asia is evolving toward a hybrid urban-rural nexus beyond the cities. This volume considers these shifting dynamics of Asian urbanization including urban spatial transformations and their ramifications in the context of sustainability and planning. Through the lens of a set of empirical studies across diverse disciplines, geographies and methodologies yet with an overarching concern for sustainability in varied but interconnected areas such as climate change, land use planning, infrastructure and urban mobility and quality of life, these studies examine a range of important topics e.g. flooding, transportation, housing, open space, green space, urban garden and such in city-regional settings. Together they add insights into varied transformational processes or patterns at work on the urban regional landscapes in a number of Asian countries while offering innovative approaches or alternatives. The proposed volume fills a gap in urban regional studies in context of South and Southeast Asia that will be of interest to all stakeholders e.g. planners, administrators, academicians and the citizenry, particularly those interested in sustainability and planning.

paradigms It should be a timely and valuable addition to the Asian urbanization literature *Climate Change 2014 - Impacts, Adaptation and Vulnerability: Global and Sectoral Aspects* Christopher B. Field, Vicente R. Barros, 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy
