Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Lorna Holtman, 2008 Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries But is providing access to institutions enough Students in developing countries often come from school environments lacking in resources human physical and financial This book in a number of chapters reviews research related

New Leaders, New Dawns? Chris Brown, David Moore, Blair Rutherford, 2022-06-17 In late 2017 and early 2018 South Africa and Zimbabwe both experienced rapid and unexpected political transitions In Zimbabwe Robert Mugabe the only leader the country had ever known was replaced in a soft coup by his erstwhile vice president Emmerson Mnangagwa Over a twelve day period in February 2018 South African president Jacob Zuma was prematurely forced from office by his former deputy president Cyril Ramaphosa The widespread popular rejoicing that accompanied their arrival compounded the shock of these sudden transitions *New Leaders New Dawns* explores these political transitions and the way they were received Contributors consider how the former liberation heroes Mugabe and Zuma could have fallen so low the underlying reasons for their ouster what happened to their liberation movements turned ruling parties and perhaps most importantly what the rise to power of Ramaphosa and Mnangagwa foreshadowed Bringing together fourteen leading international scholars of southern Africa and adopting a political economy framework this volume argues that the changes in leadership are welcome but insufficient While the time had come for Zuma and Mugabe to go there is little in the personal histories or early policy actions of Ramaphosa and Mnangagwa that suggests they will be capable of addressing the profound social economic and political problems both countries face *New Leaders New Dawns* reveals that despite what these new leaders may have promised a new dawn has not yet arrived in southern Africa

Investigating the Impact of Information Communication

Technology on Self-directed Professional Development of Teachers Emmanuel Mushayikwa, 2011-03-02 The aim of this research was to investigate the perceived impact of ICT on Zimbabwean A level science and mathematics teachers self directed professional development The study was based on a questionnaire survey of 254 teachers throughout the country Supplementary data came from 54 interviews Some observations of teachers using ICT in teacher centres e mail correspondence and field reports also contributed to the database of the study An analysis framework was developed through the use of grounded theory on the interview transcripts The framework yielded 9 themes relating to the teachers use of ICT for their professional development These were 1 perceived professional identity 2 career development 3 Managing the ICT environment 4 theoretical and content knowledge 5 practical knowledge and skills 6 adaptation 7 professional networking

and 89 perceived benefits to teachers and students. Chaos complexity theory was used to identify the major attractors/goals for teachers' self-directed professional development using ICT. Two attractors were identified: These were personal professional development and classroom practice. However, an overriding factor common to both attractors was identified as self-efficacy. The study identified the overarching driver for self-directed professional development as the teacher's need to improve their self-efficacy. A two-dimensional model of self-directed professional development was suggested. The systemic element of the model focused on the self-correcting impact of ICT use on professional development, whilst the personal element focused on self-efficacy as the central stratum for self-directed professional development. The study concluded by acknowledging the potent role that ICT is playing in the self-directed continuing professional development of teachers in Zimbabwe and recommended, among other things, the inclusion of A-level teachers in the development of localised online materials/resources for their subjects. This will help to enhance relevance of the materials to the Zimbabwean context.
