Glick, 1984 Most neurology is done by general physicians rather than by neurologists Still neurology is perceived by doctors to be one of the most troublesome and difficult medical specialties Neurologic symptoms are often vague and uncertain and seemingly insignificant symptoms can reflect frightening disorders Thomas Glick a superb teacher as well as an experienced clinician has written this book in the belief that errors in handling neurologic cases stem not so much from a failure to command a daunting body of knowledge as from inadequate clinical reasoning Dr Glick shows how the skills of the primary care physician can be applied to the special problems of neurologic history taking and physical examination He emphasizes time saving ways to focus the exam and avoid diagnostic error The book describes clear procedures for cases that the generalist can handle comfortably and offers guidelines on when and how to seek the advice of the consultant neurologist Case histories scattered liberally throughout the text highlight the discussions and give the reader a rich sampling of specific methods of problem solving Clinicians who feel skeptical about the effectiveness of neurologic therapy or frustrated by its application will find here a commonsense approach to therapeutic planning Chapters on ambulatory and chronic neurologic care also convey a positive sense of the broader therapeutic possibilities that exist in neurologic practice Neurologic residents senior medical students psychiatrists and allied health professionals as well as primary caregivers will benefit from the insights contained in this sensitive and articulate book **The Routledge Handbook of Urban Design Research Methods** Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field urban design has been made unmade and remade

**Haunting Bollywood** Meheli Sen, 2017-03-01 Haunting Bollywood is a pioneering interdisciplinary inquiry into the supernatural in Hindi cinema that draws from literary criticism postcolonial studies queer theory history and cultural studies Hindi commercial cinema has been invested in the supernatural since its earliest days but only a small segment of these films have been adequately explored in scholarly work this book addresses this gap by focusing on some of Hindi cinema s least explored genres From Gothic ghost films of the 1950s to snake films of the 1970s and 1980s to today s globally influenced zombie and vampire films Meheli Sen delves into what the supernatural is and the varied modalities through which it raises questions of film form history modernity and gender in South Asian public cultures Arguing that the supernatural is dispersed among multiple genres and constantly in conversation with global cinematic forms she demonstrates that it is an especially malleable impulse that routinely pushes Hindi film into new formal and stylistic territories Sen also argues that gender is a particularly accommodating stage on which the supernatural rehearses its most basic compulsions thus the interface between gender and genre provides an exceptionally productive lens into Hindi cinema s negotiation of the modern and the global Haunting Bollywood reveals that the supernatural s unruly energies continually resist containment even as they partake of and sometimes subvert Hindi cinema s most enduring pleasures from songs and stars to myth and melodrama
