In the article, "You Can Grow Your Intelligence," Larry Blackwell suggests that intelligence is not something you are born with, but instead everyone has the ability to grow a stronger brain. To introduce his idea, Blackwell uses the analogy of weightlifting and building muscles to illustrate how an individual can increase his/her intelligence. Next, by studying the brains of both animals and young children, Blackwell was able to conclude that environment and experience play critical roles in brain development. In conclusion, Blackwell believes just as athletes exercise and practice to build their skills, so should everyone who wants to increase their intelligence.
