Agrachev, D. Barilari, L. Rizzi, 2019-01-08 The curvature discussed in this paper is a far reaching generalization of the Riemannian sectional curvature The authors give a unified definition of curvature which applies to a wide class of geometric structures whose geodesics arise from optimal control problems including Riemannian sub Riemannian Finsler and sub Finsler spaces Special attention is paid to the sub Riemannian or Carnot Carathéodory metric spaces The authors construction of curvature is direct and naive and similar to the original approach of Riemann In particular they extract geometric invariants from the asymptotics of the cost of optimal control problems Surprisingly it works in a very general setting and in particular for all sub Riemannian spaces Coercive Care Bernadette Mcsherry, Ian Freckelton, 2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adults care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition **Professional Journal of the United States Army**, 2015 **Fat Talk** Virginia Sole-Smith, 2023-04-25 NEW YORK TIMES BESTSELLER A Book Riot best book of 2023 A Science Friday best book of 2023 An Audible best well being audiobook of 2023 By the time they reach kindergarten most kids believe that fat is bad By middle school more than a quarter of them have gone on a diet What are parents supposed to do Kids learn as we've all learned that thinness is a survival strategy in a world that equates body size and value Parents worry if their kids care too much about being thin but even more about the consequences if they aren't And multibillion dollar industries thrive on this fear of fatness We've fought the war on obesity for over forty years and Americans aren't thinner or happier with their bodies But it's not our kids or their weight who need fixing In this illuminating narrative journalist Virginia Sole Smith exposes the daily onslaught of fatphobia and body shaming that kids face from school sports doctors diet culture and parents themselves and offers strategies for how families can change the conversation around weight health and self worth Fat Talk is a stirring deeply researched and groundbreaking book that will help parents learn to

reckon with their own body biases identify diet culture and empower their kids to navigate this challenging landscape Sole Smith draws on her extensive reporting and interviews with dozens of parents and kids to offer a provocative new approach for thinking about food and bodies and a way for us all to work toward a more weight inclusive world **Scientists at War** Sarah Bridger,2015-04-06 Sarah Bridger examines the ethical debates that tested the U S scientific community during the Cold War and scientists contributions to military technologies and strategic policymaking from the dawning atomic age through the Strategic Defense Initiative Star Wars in the 1980s which sparked cross generational opposition among scientists Governance Feminism Janet Halley,Prabha Kotiswaran,Rachel Rebouché,Hila Shamir,2019-03-26 An interdisciplinary multifaceted look at feminist engagements with governance across the global North and global South Governance Feminism Notes from the Field brings together nineteen chapters from leading feminist scholars and activists to critically describe and assess contemporary feminist engagements with state and state like power Gathering examples from North America South America Europe Asia and the Middle East it complements and expands on the companion volume Governance Feminism An Introduction Its chapters argue that governance feminism GF is institutionally diverse and globally distributed emerging from traditional sites of state power as well as from various forms of governance and operating at the grassroots level in the private sector in civil society and in international relations The book begins by confronting the key role that crime and punishment play in GFeminist projects Here contributors explore the ideological and political conditions under which this branch of GF became so robust and rethink the carceral turn Other chapters speak to another face of GFeminism feminists finding in mundane and seemingly unspectacular bureaucratic tools leverage to bring about change in policy and governance practices Several contributions highlight the political strategic and ethical challenges that feminists and LGBT activists must negotiate to play on the governmental field The book concludes with a focus on feminist interventions in postcolonial legal and political orders looking at new policy spaces opened up by conflict postconflict and occupation Providing a clear cross cutting critical lens through which to map developments in feminist governance around the world Governance Feminism Notes from the Field makes sense of the costs and benefits of current feminist realities to reimagine feminist futures Contributors Libby Adler Northeastern U Aziza Ahmed Northeastern U Elizabeth Bernstein Barnard College Amy J Cohen Ohio State U Karen Engle U of Texas at Austin Jacob Gersen Harvard U Leigh Goodmark U of Maryland Aeyal Gross Tel Aviv U Aya Gruber U of Colorado Boulder Janet Halley Harvard U Rema Hammami Birzeit U Palestine Vanja Hamzi U of London Isabel Cristina Jaramillo Sierra Prabha Kotiswaran King s College London Maleiha Malik King s College London Vasuki Nesiah New York U Dianne Otto Melbourne Law School Helen Reece Darren Rosenblum Pace U Jeannie Suk Gersen Harvard U Mariana Valverde U of Toronto *Aerospace Materials and Material Technologies* N. Eswara Prasad,R.J.H. addresses scientific principles behind processing and production production details equipment and facilities for industrial production and finally aerospace application areas of these material technologies The chapters are authored by pioneers of industrial aerospace material technologies This book has a well planned layout in 4 parts The first part deals with primary metal and material processing including nano manufacturing The second part deals with materials characterization and testing methodologies and technologies The third part addresses structural design Finally several advanced material technologies are covered in the fourth part Some key advanced topics such as Structural Design by ASIP Damage Mechanics Based Life Prediction and Extension and Principles of Structural Health Monitoring are dealt with at equal length as the traditional aerospace materials technology topics This book will be useful to students researchers and professionals working in the domain of aerospace materials

Explorer Lisle A. Rose, 2013-06-29 Danger was all that thrilled him Dick Byrd's mother once remarked and from his first pioneering aviation adventures in Greenland in 1925 through his daring flights to the top and bottom of the world and across the Atlantic Richard E Byrd dominated the American consciousness during the tumultuous decades between the world wars He was revered more than Charles Lindbergh deliberately exploiting the public's hunger for vicarious adventure Yet some suspected him of being a poseur and a handful reviled him as a charlatan who claimed great deeds he never really accomplished Then he overreached himself foolishly choosing to endure a blizzard lashed six month polar night alone at an advance weather observation post more than one hundred long miles down a massive Antarctic ice shelf His ordeal proved soul shattering his rescue one of the great epics of polar history As his star began to wane enemies grew bolder and he struggled to maintain his popularity and political influence while polar exploration became progressively bureaucratized and militarized Yet he chose to return again and again to the beautiful hateful haunted secret land at the bottom of the earth claiming not without justification that he was Mayor of this place Lisle A Rose has delved into Byrd's recently available papers together with those of his supporters and detractors to present the first complete balanced biography of one of recent history's most dynamic figures *Explorer* covers the breadth of Byrd's astonishing life from the early days of naval aviation through his years of political activism to his final efforts to dominate Washington's growing interest in Antarctica Rose recounts with particular care Byrd's two privately mounted South Polar expeditions bringing to bear new research that adds considerable depth to what we already know He offers views of Byrd's adventures that challenge earlier criticism of him including the controversy over his claim to being the first to have flown over the North Pole in 1926 and shows that the critics' arguments do not always mesh with historical evidence Throughout this compelling narrative Rose offers a balanced view of an ambitious individual who was willing to exaggerate but always adhered to his principles a man with a vision of himself and the world that inspired others who cultivated the rich and famous and who used his notoriety to espouse causes such as world peace *Explorer* paints a vivid picture of a brilliant but flawed egoist offering the definitive biography of the man and armchair adventure of the highest order

Biofeedback and Sports Science J.H.

Sandweiss, S.L. Wolf, 2013-06-29 There is a new breed of athletic coach in the educational arena. While on speaking engagements around the world I've encouraged coaches to jump head first and quickly into sports science. The reason is simple. With new electronic communication systems coming on the market almost daily, athletes can get valid and reliable information to help them maximize sports skills, and this information can come faster than most coaches are able to deliver. Coaches have historically rejected most sports science efforts in favor of traditional seat-of-the-pants systems, but now there is a new kind of athlete who is asking questions never before presented to the coach. Professional athletes are individually seeking out sports scientists for answers to their particular problems. Stories appear daily in the media about athletes making quantum jumps in performance as a result of their association with sports scientists. The tidal wave is building and no one can stop it, not even the sporting goods industry. High tech athletic equipment is now a must in nearly every sport. Large sporting goods companies have nearly gone bankrupt because of competitors' new high tech products. ix X FOREWORD The tail is wagging the dog. Professional, amateur, and weekend athletes alike are demanding technical answers of our sports leaders, and they are going elsewhere if the correct answers aren't available. The number of Olympic athletes visiting our Coto Research Center in California is staggering.
