Hi, my name is Darwin Watterson. I'm ten years old and I live in Elmore. I go to school from Monday to Friday but when I'm not at school I practice sports. My favorite sports are adventure sports, especially water sports. I practice white-water rafting, kayaking and canyoning.

I always go kayaking on Monday and on Wednesday. When I finish school and after I finish my homework I take my kayak and I go to the beach with my friend Tobias. On Tuesday and on Thursday I go white-water rafting. You need a group to do white-water rafting, it is difficult but it is really exciting. I go canyoning on Friday afternoon. Canyoning is my favorite sport; you have to go down a river canyon using your hands, legs and some ropes. You need some special equipment to practice canyoning; you need a helmet to protect your head, a wetsuit not to feel cold, ropes and harness to go down the canyon. Finally, I take a rest on the weekend to play some videogames with my brother, Gumball. He doesn't like practicing sports.

Hello, I'm Skips, I'm 300 years old and I live in the park. I have to work every day of the week, from Monday to Sunday, but, when I finish my work I have a lot of free time. In my free time I like to practice sports. I personally prefer adventure sports because those are risky. I like parachuting, bungee jumping and rock climbing.

I usually go rock climbing on Saturday or Sunday afternoon. I normally go on my own. I like climbing mountains and the solitude when you reach the top of the mountain; if you want to go climbing you need to be very strong. I go bungee jumping on Friday afternoon. You need to be very brave to jump of a cliff with just a rope attached to your feet. Finally, I have to say that my favorite sport is parachuting; I love parachuting. I always go parachuting on Thursday but, I never go at night, I always go in the morning. Parachuting is when you jump off a plane with a parachute on your back, you open it during the fall and you land gently on the floor after a couple of minutes. It feels like you were flying and I love that feeling. I went once with Mordecai but he got scared and he didn't jump. Do you want to try parachuting? You need to be very brave.

1. What are Darwin's favorite sports?
2. When does he go kayaking?
3. When does he go canyoning?
4. What special equipment do you need to practice canyoning?
5. What does he do on the weekend?

6. What are Skips' favorite sports?
7. Does he go rock climbing on Friday?
8. What special quality you need to go climbing?
9. Does he go parachuting at night?
10. Did Mordecai like parachuting?

Practice and Automatization in Second Language Research Yuichi Suzuki, 2023-08-28 Practice is a recurring and popular theme in language education. However, the concepts of practice and automatization have recently received renewed theoretical and practical interest and are increasingly being explored from the skill acquisition theory and cognitive psychology perspectives. In this volume, leading scholars discuss the optimal types, amounts, and schedules of practice for specific language structures and skills, as well as for various types of learners and learning contexts to facilitate second language development. They illuminate how practice is instantiated for specific groups of teachers and learners in diverse institutionalized contexts such as foreign language curriculum development, intelligent computer-assisted language learning systems, task-based language teaching, and study abroad. Furthermore, original methodological syntheses of extant research on practice and automatization are presented along with guides for conducting empirical research on these topics. *Practice and Automatization in Second Language Research: Perspectives from Skill Acquisition Theory and Cognitive Psychology* is a valuable resource and reference for graduate students and researchers in the field of SLA and applied linguistics.

An International Approach to Developing Early Career Researchers Stephen Gorard, Nadia Siddiqui, 2024-05-14 This edited volume illustrates the idea of a successful research capacity model, critically addressing preconceived notions of early career research projects' impact and drawing together insights and implications around the encouragement of newer researchers to conduct useful, robust studies with real-world effect. Centring on research undertaken at the UK Durham University Evidence Centre, the volume features contributions from authors based at universities in the US, China, India, and Pakistan. The book discusses 15 substantial studies which explore themes such as children's wider outcomes in school, disadvantage in education, and the supply of professionals for the teaching workforce. Novel in approach and highly interdisciplinary in nature, the book showcases a broad range of experience and knowledge sharing from experienced researchers and policymakers to new academic staff, current doctoral students and masters students conducting ambitious large-scale projects, thereby giving voice to those just starting out in their career. Illustrating powerful studies that are feasible for students and beginners with limited or no resources, this book will appeal to new researchers, scholars, and academics involved in the fields of educational research and research methods, continuing professional development, and education policy more broadly.
