costly schooling they rarely if ever use and why cutting education spending is the best remedy Caplan draws on the latest social science to show how the labor market values grades over knowledge and why the more education your rivals have the more you need to impress employers He explains why graduation is our society's top conformity signal and why even the most useless degrees can certify employability He advocates two major policy responses The first is educational austerity Government needs to sharply cut education funding to curb this wasteful rat race The second is more vocational education because practical skills are more socially valuable than teaching students how to outshine their peers Romantic notions about education being good for the soul must yield to careful research and common sense The Case against Education points the way
