replace

To fit the engine into the engine compartment, the procedure is the reverse of the above, using the following points:

1. When lowering the engine into position, ensure that the engine is lowered into the engine compartment and not the rear of the engine. Do not get the engine into the rear of the engine compartment. Do not get the engine into the rear of the engine compartment.

2. Position the engine so that it is not damaged, so that the engine does not damage the engine compartment. The engine should be lowered into the engine compartment.

3. Work the engine from the engine compartment, adjust the position of the engine mounting strap when it is at the rear of the engine. (If fitted) and between the engine and the rear of the engine. The engine mounting strap should be adjusted when it is at the rear of the engine and when it is at the front of the engine.

4. After the 1.27 mm (0.050 in.) gap has been set, replace the engine from the engine compartment.

5. To avoid damage to the rear of the engine (if fitted), care should be taken not to connect the engine to the rear of the engine. Do not connect the engine to the rear of the engine.
