 Eric Schopler, 2012-12-06 The First International Leo Kanner Colloquium on Child Development Deviations and Treatment
 explores relationships between experimental research normal development and interventions with early infantile autism as a
 reference model of relatively unambiguous abnormal development Sponsored by the Treatment and Education of Autistic and
 related Communications handicapped Children TEACCH Project at the University of North Carolina at Chapel Hill the
 colloquium tackled the challenge of facilitating communications among scientists of different disciplines working in a spe-
 cialized area The meeting proved successful in generating an interplay and information exchange among scientists of diverse
 academic and professional orientation who if not completely able to agree on common factors did nevertheless achieve
 awareness and clarification of their differences The TEACCH conference and this volume have implications for all research
 efforts within and outside the domain of mental health This is particularly so at a time of limited dollar resources for research
 support The present and foreseeable future represent such a time one when communication among fields resource
 competition between basic and applied research biomedical versus psychosocial research and the question of research
 utilization assume a new commanding significance Thus the question of accountability for research has come to the fore
