Don't Tell the Boss! Dmitry Chernov,Didier Sornette,Giovanni Sansavini,Ali Ayoub,2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some

people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level. But for a variety of reasons this crucial information did not reach decision makers. So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming. What is the problem with communication about risk in an organization and why does this problem exist? What stops people in organizations or project teams from freely reporting and discussing critical risks? This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part. These case studies are drawn from around the world and span a range of industries: civil nuclear power, coal, oil and gas production, hydropower, energy, metals and mining, space exploration, transport, finance, retail, manufacturing and even the response of governments to wars, famines and epidemics. Together, case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news. The book reviews existing research on the challenges of voice and silence in organizations. This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues. The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019/2020. The full picture of the very early stage of the COVID-19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal, provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak.

What Could Possibly Go Wrong. . . . Jeremy Clarkson, 2014-09-25. *What Could Possibly Go Wrong* is the sixth book in Jeremy Clarkson's bestselling *The World According to Clarkson* series. No one writes about cars like Jeremy Clarkson. While most correspondents are too busy diving straight into BHP, MPG and MPH, Jeremy appreciates that there are more important things to life. Don't worry, we'll get to the cars eventually. But first we should consider: The case for invading France. The overwhelming appeal of a nice sit-down. The inconvenience of gin and tonic. Why clothes are no better than ice cream. Spot welding with the Duchess of Kent. And why Denmark is the best place in the world. Armed only with conviction, curiosity, enthusiasm and a stout pair of trousers, Jeremy hurtles around the world along motorway, autoroute, freeway and autobahn in search of answers to life's puzzles and ponderings without forethought or fear for his own safety. What you have to ask could possibly go wrong. Praise for Clarkson: Brilliant, laugh-out-loud. Daily Telegraph. Outrageously funny, will have you in stitches. Time Out. Very funny, I cracked up laughing on the tube. Evening Standard. Jeremy Clarkson began his career on the Rotherham Advertiser. Since then he has written for the Sun, the Sunday Times, the Rochdale Observer, the Wolverhampton Express Star, all of the Associated Kent Newspapers and Lincolnshire Life. Today he is the tallest person working in British television.
