Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09 The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a bottom up approach by calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies, human geography and development studies.

Stolen Cars Gabriel Feltran, 2022-01-18 Stolen Cars is an innovative ethnography of urban inequalities and violence in São Paulo, Brazil. Organized around the journeys of five stolen cars, each chapter discusses a specific theme such as the distinctions between violent robbery and the more commercial non-violent theft or the role of national borders interconnecting illegal and legal economies. Provides an original theoretical framework for a rarely studied urban and transnational supply chain. Draws from empirical data and a combination of different methodologies to demonstrate mechanisms of urban inequalities and violence reproduction. Highlights how everyday life is entangled with structural urban transformations. Uses an ethnographic narrative to show how urban development produces various forms of illegality and violent crime.

Saints and Soldiers Rita Katz, 2022-10-11 Winner 2022 Nellie Bly Book Award Chanticleer International Book Awards. More than a decade ago, counterterrorism expert Rita Katz began browsing white supremacist and neo-Nazi forums. The hateful rhetoric and constant threats of violence immediately reminded her of the jihadist militants she spent her days monitoring, but law enforcement and policy makers barely paid attention to the Far Right. Now, years of attacks committed by extremists radicalized online, including mass murders at a synagogue in Pittsburgh and mosques in Christchurch, New Zealand, as well as the Capitol siege, have brought home the danger. How has the internet shaped today's threats, and what do the online origins of these movements reveal about how to stop them? In *Saints and Soldiers*, Katz reveals a new generation of terrorist movements that don't just use the internet but exist almost entirely on it. She provides a vivid view from the trenches, spanning edgy video game chat groups to what ISIS and Far Right mass shooters in El Paso, Orlando, and elsewhere unwittingly reveal between the lines of their manifestos. Katz shows how the online cultures of these movements far more than their ideologies and leaders create today's terrorists and shape how they commit real world

violence From ISIS to QAnon Saints and Soldiers pinpoints the approaches needed for a new era in which arrests and military campaigns alone cannot stop these never before seen threats East Asian Regionalism Christopher M.
