

BEFORE DRIVING

8CU106

- In frontal collisions with a fixed wall that does not move or deform in less than about 25 km/h (15 mph)

8CU107

- Collision angle is offset from the vehicle angle (offset collision)

Side Air Bags and Side Curtain Air Bags

EXAMPLE

8SP1A000

Side air bags and side curtain air bags are designed to inflate in severe side impact collisions when the ignition switch is in the "ON" position or the ignition mode is "ON".

Side air bags and side curtain air bags are not designed to inflate in frontal or rear collisions, rollovers or minor side collisions, since they would offer no protection in those types of accidents. Only the side air bag and side curtain air bag on the side of the vehicle that is struck will inflate. However, in a frontal angle collision, the side air bags and side curtain air bags may inflate. Remember, since an air bag deploys only one time during an accident, seat belts are

needed to restrain occupants from further movements during the accident.

Therefore, an air bag is NOT a substitute for seat belts. To maximize your protection, **ALWAYS WEAR YOUR SEAT BELTS**. Be aware that no system can prevent all possible injuries that may occur in an accident.

Side air bags

EXAMPLE

81MM0A008

Side air bags are located in the part of the front seatbacks closest to the doors. The "SRS AIRBAG" labels are attached to the seatbacks to identify the location of the side air bags.
