International Conference on Computer Recognition Systems CORES 05 May 22 25 2005 Rydzyna Castle Poland This
conference is a continuation of a series of conferences on similar topics KOSYR organized each second year since 1999 by
the Chair of Systems and Computer Networks Wroclaw University of Technology An increasing interest to those conferences
paid not only by home but also by foreign participants inspired the organizers to transform them into conferences of
international range Our expectations that the community of specialists in computer recognizing systems will find CORES 05 a
proper form of maintaining the tradition of the former conferences have been confirmed by a large number of submitted
papers Alas organizational constraints caused a necessity to narrow the acceptance criteria so that only 100 papers have
been finally included into the conference program The area covered by accepted papers is still very large and it shows how
vivacious is scientific activity in the domain of computer recognition methods and systems It contains various theoretical
approaches to the recognition problem based on mathematical statistics fuzzy sets morphological methods wavelets syntactic
methods genetic algorithms artificial neural networks ontological models etc Most attention is still paid to visual objects
recognition however acoustic textual and other objects are also considered Among application areas medical problems are in
majority recognition of faces speech signals and textual information processing methods being also investigated **Subject**
