Qumran: The Site of the Dead Sea Scrolls: Archaeological Interpretations and Debates Jean-Baptiste Humbert, Jürgen Zangenberg, 2018-11-01 Today archaeology plays an ever growing role in Qumran studies. Fifteen papers presented in 2002 at Brown University provide the necessary data to break new ground in the recent debate about the character of Qumran. Section I discusses material from old and new excavations that help assess the validity of the traditional Qumran-Essene hypothesis. Part II discusses various aspects of the main settlement such as division of space the character of period III the date of the cave scroll deposits and the use of food. Part III deals with the Qumran cemetery and a similar graveyard at Khirbet Qazone. Part IV places Qumran into a wider regional context concentrating on local agriculture and ceramic production. The articles strongly call for a new awareness for archaeological detail and in their various ways instigate a renewed debate about how to bring texts and material culture into a meaningful dialogue.

Perfumes P.M. Muller, D. Lamparsky, 2012-12-06 The idea of publishing this book on Perfumes Art Science and Technology grew out of the observation that on the verge of the 1990s there was really no state of the art compilation of the relevant know how on which the fragrance industry is based It was obvious that such a compilation would be well received not only by perfumers and fragrance chemists but also by those involved in related trade and marketing or in the development and distribution of consumer products by researchers from other fields by students and finally by amateurs of perfumes in general Therefore we set out to find competent authors who were willing to contribute to the endeavour and we did not do this unselfishly on the contrary we selected a wish list of specialists who would provide us

with new insight and characterize the trends and research priorities determining the future Thus we were counting on learning much ourselves in the course of the project We were more than pleasantly surprised by the reactions to our first letter and so was Elsevier We certainly had not expected perfumers who are usually much more doers than writers to react in such an enthusiastic way especially the spontaneous affirmative answer from the famous E Roudnitska created a momentum which contributed significantly to the successful completion of this book But of course we should not create the impression that the other authors chapters are less important and we thank all of them heartily for their invaluable effort
