Kivett,2011-06-18 VErBAl ReAcTiONS are a new form of word scrambles with a chemical flavor You don t need to know any
science to be able to solve VErBAl ReAcTiONS puzzles but the puzzles bear a resemblance to chemical reactions Here is a
sample Es 2 S P Si 2 O N This VErBAl ReAcTiON is a word scramble consisting of one Es two S s one P
one Si two O s and one N That is the word scramble contains the elements Es S S P Si O O and N Unscramble these elements
to form an 8 symbol word that s why there are 8 blanks in the puzzle For this puzzle the answer is P O S S Es Si O N
possession These VErBAl ReAcTiONS resemble chemical reactions in two ways First the scrambled elements appear added
together on the left of the reaction with coefficients like the number 2 in the puzzle above telling you how many of each
element the solution contains and you fill in the result of the VErBAl ReAcTiON by rearranging the elements and writing
them on the blanks on the right side of the reaction Secondly all of the solutions are chemical words A chemical word is a
word that can be made using symbols from the periodic table For example the chemical word POSSEsSiON is made using the
symbols for phosphorus P oxygen O sulfur S Einsteinium Es silicon Si and nitrogen N You don t need to be familiar with the
periodic table to solve these problems nor do you need to know any chemistry You just need to be able to count and
unscramble elements to make words This Hard volume consists of words with 7 to 8 symbols which involves familiarity with
common 8 to 14 letter words Other Medium and Easy volumes consist of shorter words A unique feature of this book is that
there is a Hints section at the back separate from the Answers section for puzzlers who may be stuck and want to check just
the first letter of the solution MORE EXAMPLES 1 S Ni Ge U 2 2 C N 2 I P 3 Ti C Cr P Y
