Developmental Milestones

Developmental milestones are important journeys that everyone takes throughout out life. If the child does not reach that particular milestone for their age then they are considered to have a developmental delay. Developmental milestones are associated with a child's gross motor, cognitive, social, language, and fine motor skills. When a child develops their gross motor skills they are able to walk, stand, and sit. They learn how to use their major...

Human Behavior and Environment Irwin Altman,Joachim F. Wohlwill,2012-12-06 The papers comprising this second volume of Human Behavior and the Environment represent as do their predecessors a cross section of current work in the broad area of problems dealing with interrelation ships between the physical environment and human behavior at both the individual and the aggregate levels Considering the two volumes as a unit we have included papers covering a broad spectrum of problems ranging from the theoretical to the applied and from the disciplinary based to the interdisciplinary and professional Approximately half of the papers are written by psychologists with the remainder coming in part from such other disciplines as sociology geography and from such diverse applied and professional fields as natural recreation landscape architecture urban planning and operations research The volumes thus provide an overview of work on current topical problems Yet as the field is developing specialization is inevitably increasing apace and the editors as well as the publisher have become convinced of the desirability for future volumes in this series to be organized along topical lines with successive volumes devoted to different aspects of this rather sprawling field Thus Volume 3 currently in the planning stage

will be devoted exclusively to the interaction of children with the physical environment considered from diverse viewpoints again including authors from diverse fields of specialization
