

Personality: Biological Roots and Adaptive Dimensions

Interplay of Biology and Experience: The Evolution of Personal Identity

Personality is what separates us from one another and makes us distinct and unique. It makes us who we are. Personality can be changed, developed, grown, and gained. Personality is obtained through both nature and nurture. Within this essay, we will expand on the biological influences of personality. Two biological systems impact the human personality. Personality is developed and grown through biological impacts. Biological traditions show differences between introverts and extroverts. Research shows that introverts and extroverts need varying levels of stimulation and arousal. Biologically we are predetermined to be introverted or extroverted. Analyzing the biological side of personality is beneficial to acknowledge the effects that biology influences our reactions to others and the environments that individuals choose.

From the start of the semester, my definition of personality has remained. With each week, I gain insight into new theories and approaches and adapt my definition. Personality is what makes us who we are. Personality is a combination of nature and nurture. We develop our personalities through biology, our genes, and our predispositions. We also develop our personality through experiences and conditions that change and morph us. I believe personalities are learned through experiences, but they are also genetic and seen even from early childhood development.

Exploring the Layers of Personality: From Genetic Roots to Unique Experiences

"People express their personality in different ways in different situations" (Friedman & Schustack, 2016). Personality is not fixed and is extremely complex. I believe personality is a culmination of traits that make a person different from another. Different personality traits include extroversion, agreeableness, openness, neuroticism, introversion, sociability, irritability, etc. My personality is different from someone else's, and it is what makes me unique and different from the next person.

According to the 16 Personalities Assessment Report, I am an ISFJ and a "Defender." As an ISFJ, I am 71% introverted, 72% observant, 82% feeling, 71% judging, and 86% turbulent. Believe personalities are learned through experiences, but they are also genetic and seen even from early childhood. Throughout my childhood, I was a middle child as well as the oldest daughter in my family. The children in my family were raised at home as well as homeschooled for much of our education. I believe these unique childhood experiences shaped me and my personality to be more caring, introverted, and emotionally available to other people.

The American Essay in the American Century Ned Stuckey-French, 2011-05-31 In modern culture the essay is often considered an old fashioned unoriginal form of literary styling The word essay brings to mind the uninspired five paragraph theme taught in schools around the country or the antiquated Edwardian meanderings of English gentlemen rattling on about art and old books These connotations exist despite the fact that Americans have been reading and enjoying personal essays in popular magazines for decades engaging with a multitude of ideas through this short form means of expression To defend the essay that misunderstood staple of first year composition courses Ned Stuckey French has written The American Essay in the American Century This book uncovers the buried history of the American personal essay and reveals how it played a significant role in twentieth century cultural history In the early 1900s writers and critics debated the death of the essay claiming it was too traditional to survive the era s growing commercialism labeling it a bastion of British upper class conventions Yet in that period the essay blossomed into a cultural force as a new group of writers composed essays that responded to the concerns of America s expanding cosmopolitan readership These essays would spark the magazine revolution giving a fresh voice to the ascendant middle class of the young century With extensive research and a cultural context Stuckey French describes the many reasons essays grew in appeal and importance for Americans He also explores the rise of E B White considered by many the greatest American essayist of the first half of the twentieth century whose prowess was overshadowed by his success in other fields of writing White s work introduced a new voice creating an
