A number of suggestions are made throughout the manuscript in order to strengthen single-subject designs validity. The manuscript makes the case for the contribution of clinical case reports to clinical research and empirically-based clinical practices. Guidelines for drawing up clinical case report are given. The following manuscript sections are suggested: abstract, introduction, patient identification and reason for referral, assessment strategies, clinical case formulation, treatments, study design, data analysis, effectiveness and efficiency of the intervention, and discussion. The paper provides a general and flexible framework for each of these areas. Consistency with the constraints of common clinical practices and settings is intended.

KEY WORDS. Guidelines. Single-case experiment. Case studies. Case series. Clinical case formulation. Theoretical study.
