IBM i2 Integrated Law Enforcement: Technical Architecture and Deployment Guide Wil Jamison, John Dowling, IBM Redbooks, 2014-11-17 IBM i2 Integrated Law Enforcement is an IBM Smarter Cities solution that addresses the needs of modern day law enforcement agencies. It is a solution framework that provides the individual capabilities of the products that comprise the solution and extended capabilities developed through the synergistic integration of those product components. The Road to IP Telephony tells you how Cisco Systems successfully moved its own organization to a converged enterprise-wide network. You will learn the implementation and operational processes that worked, what didn't work and how to develop your own successful methodology. After presenting this topic to hundreds of Cisco customers including Fortune 500 companies, Stephanie Carhee consistently encountered the same question: "If I decide to move to IP Telephony, where do I begin and what can I do to ensure that I do it right the first time?" Although the needs of every enterprise are different, some things are universal: planning, communication, teamwork and understanding your user's requirements are as important as technical expertise. The Road to IP Telephony shares with you everything you need to know about managing your deployment. It starts with where to begin, including what needs to be addressed before you even begin the planning process, to building your project team. Key best practices are also offered to help you set the project's pace and schedule, get your users on board, identify a migration strategy, develop a services and support strategy and work toward the final PBX decommission.
