

ICP Second Semester Test Review

The following is a list of the test reviews I have given to you for each chapter this semester. You should already have the answers to these questions as we reviewed them in class together during each chapter. I have changed the math problems, so that you can work them out with new numbers. As you study for the semester test, I would suggest you review the test reviews you have already completed for each chapter. Then use the following as practice test questions. On questions you already know, skip over them, focus on the material that you need to review. The only new material on this list are the questions from the Energy Unit at the end.
