Drees,2009-09-10 How should we think about religion science and their relationship in modern society Some religious groups oppose evolution some atheists claim science is on their side Others reconcile their beliefs with science or consider science and faith to deal with fundamentally different aspects of human life What indeed is religion belief or trust in God s existence

How do we distinguish sense from superstition What does science have to say on such issues Willem B Drees considers contemporary discussions of these issues in Europe and North America using examples from Christianity and religious naturalism and reflections on Islam and Tibetan Buddhism He argues that the scientific understanding leaves open certain ultimate questions and thus allows for belief in a creator but also for religious naturalism or serious agnosticism By analysing the place of values in a world of facts and the quest for meaningful stories in a material world Religion and Science in Context offers an original and self critical analysis of the field its assumptions and functions and ends with a vision of its possible future

In this collection of essays originally presented at the Academy of European Law in Florence the changing landscape of the EU s legal acts is explored Further to this the changing boundaries between legal acts and processes which may create norms but do not create law in the traditional sense are analysed This landscape is presented in two ways Firstly by focusing on the transformations and challenges to the EU s traditional legal acts in particular since the reconfiguration of the categories of legal acts and the procedures for which they are adopted by the Lisbon Treaty Secondly the collection focuses on those acts found at or beyond the margin of classic EU legal acts including acts of Member States such as inter se treaties self regulation and collective agreements so called soft law and decision making outside the normal legislative procedures The volume endeavours to explain the adaptability of the EU legal order despite the fact that the legal instruments at the Union s disposal have not fundamentally changed since the Treaty of Rome came into force 60 years ago It explores the challenges that new decisional procedures and variations in the legal quality of EU acts pose for the EU s legal order including alterations to institutional balance and the roles of the different institutional actors and challenges to the rule of law
