Environmental Organic Chemistry Rene P. Schwarzenbach, Philip M. Gschwend, Dieter M. Imboden, 2016-10-12
Examines in a pedagogical way all pertinent molecular and macroscopic processes that govern the distribution and fate of organic chemicals in the environment and provides simple modeling tools to quantitatively describe these processes and their interplay in a given environmental system Treats fundamental aspects of chemistry physics and mathematical modeling as applied to environmentally relevant problems and gives a state of the art account of the field Teaches the reader how to relate the structure of a given chemical to its physical chemical properties and intrinsic reactivities Provides a holistic and teachable treatment of phase partitioning and transformation processes as well as a more focused and tailor made presentation of physical mathematical and modeling aspects that apply to environmental situations of concern Includes a large number of questions and problems allowing teachers to explore the depth of understanding of their students or allowing individuals who use the book for self study to check their progress Provides a companion website which includes solutions for all problems as well as a large compilation of physical constants and compound properties **David's**

Question Edward Reaugh Smith, 2001-11 This collection of the astronomical writings by Dr Elisabeth Vreede is a fascinating compendium of scientific and spiritual knowledge Between September 1927 and August 1930 Dr Vreede wrote a monthly letter available by subscription about both modern astronomy and classical astrology in the light of spiritual science These letters include clear explanations of the fundamentals of astronomy and discussions on the role of astrology in the modern world They also include inspiring presentations of a worldview that sees the stars planets and all physical phenomena as manifestations of spiritual beings and spiritual activities A previous edition was published as Anthroposophy and Astrology
