The External World and Our Knowledge of it Fred Wilson, 2008-01-01 David Hume is often considered to have been a sceptic particularly in his conception of the individual s knowledge of the external

world However a closer examination of his works gives a much different impression of this aspect of Hume's philosophy one that is due for a thorough scholarly analysis This study argues that Hume was in fact a critical realist in the early twentieth century sense a period in which the term was used to describe the epistemological and ontological theories of such philosophers as Roy Wood Sellars and Bertrand Russell Carefully situating Hume in his historical context that is relative to Aristotelian and rationalist traditions Fred Wilson makes important and unique insights into Humean philosophy Analyzing key sections of the Treatise the Enquiry and the Dialogues concerning Natural Religion Wilson offers a deeper understanding of Hume by taking into account the philosopher's theories of the external world Such a reading the author explains is not only more faithful to the texts but also reinforces the view of Hume as a critical realist in light of twentieth century discussions between externalism and internalism and between coherentists and foundationalists Complete with original observations and ideas this study is sure to generate debates about Humean philosophy critical realism and the limits of perceptual knowledge
