Use dominoes to illustrate how crossing-over contributes to genetic diversity. Use Figure 6.26 for reference. 1. Draw a cell with four chromosomes in the first box. Make one pair of chromosomes large and the other pair small. Color in one large chromosome and one small chromosome. Label the other two chromosomes white. 2. In the next box, show they will be prepared to line up each pair of homologous chromosomes line up together—large with large, small with small. 3. In the third box, show crossing over between each pair of homologous chromosomes. 4. In the last box, show what the chromosomes look like as a result of crossing over.
