Empathy and the Strangeness of Fiction Maria C. Scott, 2020-03-02 Explores how and why narrative fiction engages empathy, including Theory of Mind. Offers a broad overview of current scientific work on the effects of fiction reading on empathy, including Theory of Mind. Provides an original intervention in the field of literary theory, centring on the reflexive properties of the fictional stranger. Includes stand-alone close readings of three novels by important French authors. This book studies recent psychological findings which suggest that reading fiction cultivates empathy, encouraging us to be critically reflective, suspicious readers as well as participatory, naïve readers. Scott draws on literary theory and close readings to argue that engagement with fictional stories also teaches us to resist uncritical forms of empathy and reminds us of the limitations of our ability to understand other people. The book treats figures of the stranger in Balzac's *La Fille aux yeux d'or* or Stendhal's *Le Rouge et le Noir* and Sand's *Indiana* as emblematic of the strangeness of narrative fiction, both drawing us in and keeping us at a distance.

Mad World: The Seduction of Insanity Mark Romel, 2018-02-07 Blaise Pascal said, "Men are so necessarily mad that not to be mad would amount to another form of madness." Crazy people get locked up. Their madness is easy to detect. They have drastically disordered thoughts. It's as if their dream content is leaking into their daytime reality. They don't make sense. They can't keep it together. They're incoherent. They can't interact meaningfully with others. They have lost touch with reality. But what if there's a second kind of madness, a much more subtle and dangerous kind that goes unnoticed? In this version of madness, people have ordered thoughts, indeed often highly ordered. They make sense. They keep it together. They can meaningfully interact with others, often brilliantly, and they seem completely in touch with reality. What's not to like? Not one of them is locked up. Far from it. In fact, some of them are running our world.

Understanding Emotion at Work Stephen Fineman, 2003-05-27 This introductory text on emotions is aimed specifically at students of management and organization studies. Written accessibly, it avoids pat prescriptions but leaves the reader with challenging questions about the intrinsic nature of emotions to the design and management of organizations.

Pathological Altruism Barbara Oakley, Ariel Knafo, Guruprasad Madhavan, David Sloan Wilson, 2011-12-19 Pathological Altruism is a groundbreaking new book, the first to explore the negative aspects of altruism and empathy, seemingly uniformly positive traits. In fact, pathological altruism, in the form of an unhealthy focus on others to the detriment of one's own needs, may underpin some personality disorders. Hyperempathy, an excess of concern for what others think and how they feel, helps explain popular but poorly defined concepts such as codependency. The contributing authors of this book provide a scientific, social, and cultural foundation for the subject of pathological altruism, creating a new field of inquiry. Each author's approach points to one disturbing truth: what we value so much, the altruistic good side of

human nature can also have a dark side that we ignore at our peril *Jones, Brinkert* Tricia S. Jones, Ross Brinkert, 2008

Recent research shows that between 25-85% of conflict disputants referred to mediation choose not to participate i.e. they resist wanting to meet face to face. In the field of conflict resolution, conflict coaching is the only process that has emerged which allows resolution methods to work on a one-on-one basis. *Conflict Coaching: Conflict Management Strategies and Skills for the Individual* defines this growing area of conflict resolution and distinguishes conflict coaching as a stand-alone resolution technique. In a service society where human relationships are central to our professional as well as personal lives, individuals value one-on-one attention to obtain custom solutions for handling important interpersonal communication. Rooted in research and theory, the text is organized into three sections: *Introducing Conflict Coaching*, *Conducting Conflict Coaching*, and *Integrating Conflict Coaching*, and offers a practical model for coaching. It is a useful volume for students and practitioners in a range of academic disciplines including communication, alternative dispute resolution, conflict resolution, business education, law, psychology, sociology, and social work. The CD-ROM accompanying the book provides numerous resources for instructors, coaches, and other interested readers, including worksheets for techniques and approaches presented in the chapters, feedback forms for clients and their organizations, sample syllabi, learning objectives, paper assignments, PowerPoints, additional case studies and readings, and suggested hyperlinks to relevant Web sites. In *Conflict Coaching*, Tricia S. Jones and Ross Brinkert have made a timely contribution to the advancement of the field of conflict analysis and dispute resolution. They simultaneously present a clear vision of the role of a conflict coach as well as a persuasive argument for a new and expanded mind set on who it is we say we are and what it is we say we do. The book makes credible arguments about the need for the conflict coach and then clearly blows open a much-needed area of practice that has been unnecessarily restrained by outdated and untestable notions. The authors accomplish this by combining first-rate scholarship with an easy-to-read guide on the practice of conflict coaching to create an evolutionary path within the field. From this book, expect to see a flurry of other scholars and practitioners follow their lead in both print and practice. Brian Polkinghorn, Ph.D., Distinguished Professor and Director, Conflict Analysis and Dispute Resolution, Wilson Elkins Professor, University System of Maryland, Executive Director, Center for Conflict Resolution, Salisbury University. *Conflict Coaching* is a book that should be in every corporate library and in every chief human resource officer's desk so others can see it. Moreover, this book should be provided for every young high-potential corporate manager and be required reading in business school executive education programs. Frank P. Brennan, J.E., Former Chief of Staff to the Postmaster General of the United States. Jones and Brinkert offer example case studies illustrating the subject of each chapter, scholarly research throughout, a wonderfully approachable text, and a companion CD of tools that makes a perfect addition to any Ombudsman's library. Not only is this a terrific resource for us LTCOs but also for Organizational Ombuds and other ADR professionals and practitioners seeking to clarify the whats and hows of empowering those we serve to better respond to the conflicts they face.
