

Teaching is part of a life-long learning process. For effective teaching, teachers must be good learners. This certificate program in college teaching provided me with many opportunities to think about my teaching career. In this section of my teaching ePortfolio, I will answer several questions regarding teaching, ePortfolio, and the certificate program.

What was the most striking or surprising thing you learned about yourself and about teaching as you developed your ePortfolio?

Through the ePortfolio development process, I realized that teaching is one of the most difficult activities I will perform in my life. Knowing or understanding subjects does not necessarily mean I will be able to teach the subjects well. To enhance students' learning, I must create an appropriate learning environment through various teaching strategies and presentation methods. There is no single best solution; I should continuously try new things and improve my teaching skills.

Based on the materials you wrote, what will be your greatest strength as a teacher?

As I discussed in my teaching philosophy statement, I believe in the importance of repeated exposure to a subject. For "repeated exposure," I should prepare well-organized class materials so students can recall previously taught materials easily. My greatest strength as a teacher is my organization skill. I will prepare very organized lesson plans and slides for my classes.

In addition, I always like to explore new subjects – I am very flexible and will change my lesson plans if needed. I will continuously revise my teaching materials. This way, I can provide the most recent, updated information to students.

What will be your greatest challenge as a teacher?

Increasing students' engagement is the greatest challenge as a teacher, especially in the basic lower-level courses. Many students may take such basic introductory courses without strong motivation. As a student, grades are important, of course; however, I want to teach students that applying (or at least recalling) what they learned in their classes, even after college, is much more important than just focusing on class grades.

In addition, balancing between "be strict" and "be flexible" is also a great challenge for me. I want students to follow my policy, such as late work policy. However, I want to be flexible to meet students' needs and interests. Being too strict may damage students' interest and participation in the class, but being too flexible can also hurt students' engagement in the class. I should improve my teaching method to create a good teaching and learning environment.

How did the combination of workshops, experimental learning, assignment development, syllabi construction, and lesson plan creation lead to new understanding about teaching?

The combination of teaching workshops, teaching classes, class material development, and actual teaching provided a great opportunity to enhance my teaching skills. I was able to learn basic teaching principles from teaching classes, apply teaching principles in class material development and actual teaching, and learn new teaching methods and issues from teaching

Self-Evaluation: Fostering Reflective Learning Jean MacGregor, 1993 For several decades college teachers have been asking students to engage in self evaluation to reflect on their academic work and describe and evaluate it in writing Student self evaluation is both a process consisting of acts of reflecting composing and writing and a product a written document Student self evaluation does not obviate the need for student exams and papers crucial indicators of student mastery of material or complexity of thinking Rather student self evaluation supplements and complements that information by asking students to describe in their own words their learning and its value to them This writing and the conversations that faculty members and students have about it can be instructional illuminating and at times transformative Student self evaluation is primarily a learning strategy but it is also a promising assessment approach while enriching learning for students it also can help teachers and institutions learn about student learning This volume of New Directions for Teaching and Learning introduces the many forms of student self evaluation in undergraduate teaching settings and describes how student self evaluation creates connections between learners and learning knowers and the known and the self and the mind This is the 56th issue of the quarterly journal New Directions for Teaching and Learning For more information on the series please see the Journals and Periodicals page **Experimental Writing in Composition** Patricia Suzanne Sullivan, 2012-12-15 From

the outset experimental writing has been viewed as a means to afford a more creative space for students to express individuality underrepresented social realities and criticisms of dominant socio political discourses and their institutions Yet the recent trend toward multimedia texts has left many composition instructors with little basis from which to assess these new forms and to formulate pedagogies In this original study Patricia Suzanne Sullivan provides a critical history of experimental writing theory and its aesthetic foundations and demonstrates their application to current multimodal writing Sullivan unpacks the work of major scholars in composition and rhetoric and their theories on aesthetics particularly avant gardism She also relates the dialectics that shape these aesthetics and sheds new light on both the positive and negative aspects of experimental writing and its attempts to redefine the writing disciplines Additionally she shows how current debates over the value of multimedia texts echo earlier arguments that pitted experimental writing against traditional models Sullivan further articulates the ways that multimedia is and isn't changing composition pedagogies and provides insights into

Work in Hand Aileen Douglas, 2017-03-02 Oxford Textual Perspectives is a new series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works Work in Hand Script Print and Writing 1690 1840 argues that

between the late seventeenth and early nineteenth centuries manual writing was a dynamic technology. It examines script in relation to becoming a writer in constructions of the author and in emerging ideas of the human. Revising views of print as displacing script. *Work in Hand* argues that print reproduced script, print generated script and print shaped understandings of script. In this, the double nature of print as both moveable type and rolling press is crucial. During this period, the shapes of letters changed as the multiple hands of the early modern period gave way to English round hand; the denial of writing to the labouring classes was slowly replaced by acceptance of the desirability of universal writing; understandings of script in relation to copying and discipline came to be accompanied by ideas of the autograph. The work begins by surveying representations of script in letterpress and engraving. It discusses initiation into writing in relation to the copy books of English writing masters and in the context of colonial pedagogy in Ireland and India. The middle chapters discuss the physical work of writing, the material dimensions of script and the autograph in constructions of the author in the late eighteenth and early nineteenth centuries and in relation to Samuel Johnson, Alexander Pope, William Blake, Isaac D'Israeli and Maria Edgeworth. The final chapter considers the emerging association of script with ideas of the human in the work of the Methodist preacher Joseph Barker.

A Rhetoric of Reflection Kathleen Yancey, 2016-08-15

Reflection in writing studies is now entering a third generation. Dating from the 1970s, the first generation of reflection focused on identifying and describing internal cognitive processes assumed to be part of composing. The second generation, operating in both classroom and assessment scenes in the 1990s, developed mechanisms for externalizing reflection, making it visible and thus explicitly available to help writers. Now a third generation of work in reflection is emerging. As mapped by the contributors to *A Rhetoric of Reflection*, this iteration of research and practice is taking up new questions in new sites of activity and with new theories. It comprises attention to transfer of writing knowledge and practice, teaching and assessment portfolios, linguistic and cultural difference and various media, including print and digital. It conceptualizes conversation as a primary reflective medium, both inside and outside the classroom and for individuals and collectives, and articulates the role that different genres play in hosting reflection. Perhaps most important in the work of this third generation is the identification and increasing appreciation of the epistemic value of reflection, of its ability to help make new meanings and of its rhetorical power for both scholars and students.
