One of Us Åsne Seierstad, 2015-04-21 A New York Times bestseller and the basis for the Netflix film 22 July A chilling descent into the mind of mass murderer Anders Breivik Kirkus Reviews One of The New York Times Book Review s Ten Best Books of 2015 On July 22 2011 Anders Behring Breivik detonated a bomb outside the Norwegian prime minister s office in central Oslo killing eight people He then proceeded to a youth camp on the wooded island of Utøya where he killed sixty nine more most of them teenage members of the country s governing Labour Party In *One of Us* the journalist Åsne Seierstad tells the story of this terrible day and its reverberations How did Breivik a gifted child from an affluent neighborhood in Oslo become Europe s most reviled terrorist How did he accomplish an astonishing one man murder spree And how did a famously peaceful and prosperous country cope with the slaughter of so many of its young Delving deep into Breivik s childhood Seierstad shows how a hip hop and graffiti aficionado became a right wing activist a successful entrepreneur and then an Internet game addict and self styled master warrior who believed he could save Europe from the threat of Islam and multiculturalism She writes with equal intimacy about Breivik s victims tracing their political awakenings teenage flirtations and hopes and ill fated journeys to the island In the book s final act Seierstad describes Breivik s tumultuous public trial Lauded in Scandinavia for its literary merit and moral poise *One of Us* is at once a psychological study of violent extremism a dramatic true crime procedural and a compassionate inquiry into how a privileged society copes with homegrown evil

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European CE nations of Czechia East Germany Hungary Poland and Slovakia from 1989 onwards Enticed by relatively lower wage labour and significant government incentives the world s largest automakers have launched more than 20 passenger car assembly complexes in CE nations with production accelerating dramatically since 2001 As a result the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015 and alternatively in the CEE it increased by nearly 170% during this period Drawing on case studies of 25 current and former foreign run assembly plants the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift This book will expand the knowledge of policy makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business economic history political science and development

The Evolution of European Manufacturing Industries

Bolesław Domański, Grzegorz Micek, Robert Guzik, Krzysztof Gwosdz, Arkadiusz Kocaj, 2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks discussing the underlying economic social and political factors The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated high value added products new technologies and the development of non production functions especially design and advanced service capabilities The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery in particular low density and diversity low productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development
