### No power / won't get into programming mode

If you **don't** see connection interface. Make sure (PESIP FPC) is connected to vehicle's battery, not constant battery. Otherwise, disconnect it at.

### The (PESIP FPC) controls the vehicle immediately without pressing any buttons on the steering wheel

During programming, press the buttons on the steering wheel fully with the (PESIP FPC) turn off. Releasing the button too early will cause the (PESIP FPC) to send out a signal even when no buttons are pressed.

### The (PESIP FPC) controls the radio when on the steering wheel is turned (mostly late 80's early 90's Honda/Acura)

Program button (PESIP FPC) 2 for version 4.1.

### When user's program a new button the previous button does not work

When programming all buttons during programming. If you try to program another button, all previous button will be stored. You will have to release all previous buttons again.
