

# Perl Best Practices

## Reference Guide

### Code Layout

1. Brace and parenthesize in RAR style.
2. Separate your control keywords from the following opening bracket.
3. Don't separate subroutines or variable names from the following opening bracket.
4. Don't use unnecessary parentheses for routine and temporary handles.
5. Separate complex keys or indices from their surrounding brackets.
6. Use whitespace to help binary operators stand out from their operands.
7. Place a semicolon after every statement.
8. Place a colon after every value in a multiline list.
9. Use 78-column lines.
10. Use four-column indentation levels.
11. Indent with spaces, not tabs.
12. Never place two statements on the same line.
13. Code in paragraphs.
14. Don't ciddle an `else`.
15. Align corresponding items vertically.
16. Break long expressions before an operator.
17. Factor out long expressions in the middle of statements.
18. Always break a long expression at the opening of the lowest possible precedence.
19. Break long assignments before the assignment operator.
20. Format cascaded ternary operators in columns.
21. Parenthesize long lists.
22. Enforce your chosen layout style mechanically.

### Naming Conventions

23. Use grammatical templates when naming identifiers.
24. Name handles after their associated box.
25. Mark variables that store references with a `_ref` suffix.
26. Name arrays in the plural and handles in the singular.
27. Use underscores to separate words in multimed identifiers.
28. Distinguish different program components by case.
29. Note down the prefix.
30. Abbreviate only when the meaning remains unambiguous.
31. Avoid using inherently ambiguous words in names.
32. Prefix for internal use only' subroutines with an underscore.

### Values and Expressions

33. Use interpolating string delimiters only for strings that actually interpolate.
34. Don't use `""` or `''` for an empty string.
35. Don't write one-character strings in visually ambiguous ways.
36. Use named character escapes instead of numeric escapes.
37. Use named constants, but don't use `constant`.
38. Don't pad decimal numbers with leading zeros.

39. Use underscores to improve the readability of long numbers.
40. Lay out multiline strings over multiple lines.
41. Use a heredoc when a multiline string exceeds two lines.
42. Use a 'heredoc' when a heredoc would compromise your indentation.
43. Make every heredoc terminate a single uppercase identifier with a standard prefix.
44. When introducing a heredoc, quote the terminator.
45. Don't use backslashes.
46. Reserve `or` for pairs.
47. Don't use commas to sequence statements.
48. Don't mix high- and low-prioridade handles.
49. Parenthesize every `or` list.
50. Use table-lookup to test for membership in lists of strings, not `any()` for membership of lists of anything else.

### Variables

51. Avoid using mathematical variables.
52. Don't use package variables in your own development.
53. If you're forced to modify a package variable, *localize* it.
54. Initialize any variable you *localize*.
55. *use English* for the few familiar punctuation variables.
56. If you're forced to modify a punctuation variable, *localize* it.
57. Don't use the same magic variables.
58. Beware of any modification via `$_`.
59. Use negative indices when counting from the end of an array.
60. Take advantage of both and some slicing.
61. Use a tabular layout for slices.
62. Factor large key or index lists out of their slices.

### Control Structures

63. Use block `if`, not prefix `if`.
64. Reserve prefix `if` for flow-of-control statements.
65. Don't use prefix `unless`, `for`, `while`, or `until`.
66. Don't use `unless` or `until` at all.
67. Avoid C-style `for` statements.
68. Avoid subscripting arrays or hashes within loops.
69. Never subscript more than once in a loop.
70. Use named literals as explicit `for` loop iterators.
71. Always declare a `for` loop iterator variable with `my`.
72. Use `map` instead of `for` when generating new lists from old.
73. Use `grep` and `first` instead of `for` when searching for values in a list.
74. Use `for` instead of `map` when transforming a list in place.
75. Use a subroutine call to factor out complex list transformations.
76. Never modify `$_` in a list function.
77. Avoid cascading `if`.
78. Use table-lookup in preference to cascaded equality tests.
79. When producing a value, use tabular constructs.
80. Don't use `do...while` loops.
81. Repeat as many iterations as possible, as early as possible.
82. Don't control loop structures just to concatenate control.
83. Use `for` and `redo` instead of an irregularly created `while`.
84. Label every loop that is exited explicitly, and use the label with `next`, `last`, or `redo`.

### Documentation

85. Distinguish user documentation from technical documentation.
86. Create standard POD templates for modules and applications.
87. Extend and customize your standard POD templates.
88. Put user documentation in source files.
89. Keep all user documentation in a single place within your source file.
90. Place POD as close as possible to the end of the file.
91. Subdivide your technical documentation appropriately.
92. Use block comments for major comments.
93. Use full-line comments to explain the algorithm.
94. Use end-of-line comments to point out subtleties and address.
95. Comment anything that has puzzled or misled you.
96. Consider whether it's better to write than to comment.
97. Use 'invisible' POD sections for longer technical discussions.
98. Check the spelling, syntax, and sanity of your documentation.

### Built-in Functions

99. Don't recompute sort keys inside a `sort`.
100. Use `reverse` to reverse a list.
101. Use scalar `reverse` to reverse a scalar.
102. Use `unpack` to extract fixed-width fields.
103. Use `split` to extract simple variable-width fields.
104. Use `unpack` to extract complex variable-width fields.
105. Avoid string `eval`.
106. Consider building your sorting routine with `sort` + `block`.
107. Use `long` `sublist` instead of `index` `sublist`.
108. Make appropriate use of brace values.
109. Use `glob`, not `q*`.
110. Avoid a raw `select` for non-integer sleeps.
111. Always use a block with a `map` and `grep`.
112. Use the 'non-handle handle'.

### Subroutines

113. Call subroutines with parentheses but without a leading `&`.
114. Don't give subroutines the same names as built-in functions.
115. Always inspect `$_` first.
116. Use a block of nested arguments for any subroutine that has more than three parameters.
117. Use `definedness` or `existence` tests for missing arguments.
118. Resolve any default argument values as soon as `$_` is inspected.
119. Always return scalar in scalar returns.
120. Make list-returning subroutines return the 'official' value in scalar context.
121. When there is no 'official' scalar context return value, consider `undef` or `chance` instead.
122. Don't use subroutine prototypes.
123. Always return via an explicit `return`.
124. Use a bare `return` to return failure.

### IO

125. Don't use `foreach` filehandles.
126. Use indirect filehandles.
127. If you have to use a package filehandle, *localize* it first.

## **Perl Best Practices Introduction**

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Perl Best Practices free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Perl Best Practices free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Perl Best Practices free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Perl Best Practices. In conclusion, the internet offers numerous platforms and websites that allow users

to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Perl Best Practices any PDF files. With these platforms, the world of PDF downloads is just a click away.

## FAQs About Perl Best Practices Books

**What is a Perl Best Practices PDF?** A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it.

**How do I create a Perl Best Practices PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF.

**How do I edit a Perl Best Practices PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities.

**How do I convert a Perl Best Practices PDF to another file format?** There are multiple ways to convert a PDF to another format:

Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats.

**How do I password-protect a Perl Best Practices PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities.

**How do I compress a PDF file?** You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss.

Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs?

Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
