### Underlying Principles

Triage tagging:  
-green: minor injuries; generally ambulatory with injuries that can wait until higher priority patients are treated; do not require life support  
  
-yellow: urgent, non-life threatening injuries; able to have care delayed without significant increase in chances of mortality  
  
-red: life-threatening requiring immediate intervention; good chance of recovery with care  
  
-black: deceased or expectant  
  
Resources and personnel are allocated in a manner that saves the most life and time  
  
Priority is based on urgency and emergent care

### Nursing Interventions

Discharge stable patients to free up beds and rooms for victims of mass casualty event  
  
Relocate ambulatory or minimal care patients if not safe for discharge  
  
Triage and tag incoming victims green, yellow, red, or black depending on extent of injuries  
  
Assess victims of mass casualty events and terrorist attacks for shared symptoms that could indicate a biological or chemical threat  
  
Be cautious of decontamination efforts from scene, isolate patients with exposure  
  
Don appropriate PPE
