Designing and Teaching the Secondary Science Methods Course

Aaron J. Sickel, Stephen B. Witzig, 2017-04-13 The improvement of science education is a common goal worldwide. Countries not only seek to increase the number of individuals pursuing careers in science but to improve scientific literacy among the general population. As the teacher is one of the greatest influences on student learning, a focus on the preparation of science teachers is essential in achieving these outcomes. A critical component of science teacher education is the methods course where pedagogy and content coalesce. It is here that future science teachers begin to focus simultaneously on the knowledge, dispositions, and skills for teaching secondary science in meaningful and effective ways. This book provides a comparison of secondary science methods courses from teacher education programs all over the world. Each chapter provides detailed descriptions of the national context, course design, teaching strategies, and assessments used within a particular science methods course and is written by teacher educators who actively research science teacher education. The final chapter provides a synthesis of common themes and unique features across contexts and offers directions for future research on science methods courses. This book offers a unique combination of behind-the-scenes thinking for secondary science methods course designs along with practical teaching and assessment strategies and will be a useful resource for teacher educators in a variety of international contexts.

Paradigm Shifts in 21st Century Teaching and Learning

Orakci, Şenol, 2020-04-24 One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability of information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.

God's Hard-Knock Lessons Larry Cumberland,2024-05-23 I wrote this book to communicate many of the lessons that God has taught me through many trials in my life I hope to provide you those hard knock lessons without the cost I paid for them in physical mental and spiritual pain My reference to hard knock lessons is based on the fact that most of them were self inflicted in that God promises chastening to those that He loves I clearly understand that God must love me a lot based on the frequency of the chastening Those lessons sometimes came with scars that lasted a lifetime although God forgave the sin from the beginning Also I included doctrinal truths that I learned far too late in my life I so wish I had learned them earlier as my life would have been more peaceful and spiritually more productive The lessons were typically learned later than desired due to my lack of knowledge from a specific doctrinal teaching in the Bible I sincerely feel God inspired and led me to write this book The initial thought occurred when several people commented on my extraordinary life experiences and the lessons learned from those experiences God healed me miraculously on two occasions during my life Those comments were usually followed by a comment of needing to write a book As for my investment in time and effort in providing you knowledge that I hope you find as valuable I offer that my time in writing was precious as related to the time I have remaining to live I write it while doctors have diagnosed me with stage 4 cancer and two to five months of life remaining I pray for God s third time of healing [Music Outside the Lines](#) Maud Hickey,2012-11-01 Music Outside the Lines both
