Shooting Stars

Have you ever seen a shooting star? Shooting stars happen anytime, because they are hot balls of light. They can travel as fast as 100,000 miles per hour! If you have seen one, you've actually seen a meteor (a bright streak of light). Earth's surface isn't as hot as these streaks of light, so they can't move through our atmosphere. They can be as small as a grain of sand or as large as a house.

The light around the sun for the planets, when the sun heats the planets, and pieces break off. The pieces can fall toward Earth and catch on fire. They become meteors. The temperature of a meteor is about 1,000 degrees Fahrenheit. When people see a shooting star in the sky, it is actually a trail of light behind a burning meteor. These light trails can be seen everywhere, any

The color of the light trail behind the meteor depends on the materials that it is made of. Different materials have different colors. If there are a lot of materials falling at once, it is called a meteor shower. Some scientists even study meteors to

Herrell,Michael Jordan,2002 This book incorporates the strongest and most current research available to help teachers actively involve their students in the reading comprehension process Teachers receive expert guidance in a step by step format that clearly states and fully illustrates each of the 50 strategies It delivers must have information that enables teachers to assess their students current strategies A six section organization enables teachers to easily access appropriate strategies for specific teaching objectives word and sentence level comprehension paragraph level comprehension integrating background knowledge holistic comprehension self monitoring strategies and assessment to inform instruction For elementary school teachers **The Cognitive Foundations of Reading and Its Acquisition** Wesley A. Hoover,William E. Tunmer,2020-06-09 This book serves as a succinct resource on the cognitive requirements of reading It provides a coherent overall view of reading and learning to read and does so in a relatively sparse fashion that supports retention The initial sections of the book describe the cognitive structure of reading and the cognitive foundation upon which that structure is built This is followed by discussions of how an understanding of these cognitive requirements can be used in practice with standards assessments curriculum and instruction to advance the teaching of reading and the delivery of interventions for students who encounter difficulties along the way The book focuses on reading in English as its exemplar but shows how its framework can be adapted to understand the broad cognitive requirements for reading and learning to read in any phonologically based orthography It provides a way

for reading professionals to think about reading and its development and gives them mechanisms that coupled with such understanding will help them link what children must know to become strong readers to what teaching can best provide through the competent use of available tools In this way the book will help reading professionals be both efficient and effective in what they provide all their students and be much better equipped to support those students who struggle to learn to read
