

Section 5-3 Human Population Growth (pages 129-132)

This section describes how the size of the human population has changed over time. It also explains why population growth rates differ in countries throughout the world.

Historical Overview (page 129)

1. How does the size of the human population change with time? It tends to increase with time.
2. Why did the population grow slowly for most of human existence? Life was harsh, and limiting factors kept population sizes low.
3. Circle the letter of each reason why the human population began to grow more rapidly about 500 years ago.
 - ☒ a. Improved sanitation and health care reduced the death rate.
 - ☒ b. Industry made life easier and safer.
 - ☒ c. The world's food supply became more reliable.
 - ☐ d. Birthrates in most places remained low.

Patterns of Population Growth (pages 130-131)

4. Why can't the human population keep growing exponentially forever? Earth and its resources are limited.
5. What is demography? It is the scientific study of human populations.
6. What factors help predict why the populations of some countries grow faster than others? Factors include birthrates, death rates, and the age structure of the populations.
7. The hypothesis that explains why population growth has slowed dramatically in the United States, Japan, and much of Europe is called the demographic transition.
8. Throughout much of human history, what have been the levels of birthrates and death rates in human societies? Human societies have had high birthrates and equally high death rates.
9. What factors lower the death rate? Advances in nutrition, sanitation, and medicine lower the death rate.
