Geographic Approaches to Climate Change and Mitigation:

Urban and Rural Perspectives (Volume 1) Pir Mohammad,Shahfahad,Jesús Rodrigo Comino,Abraham R.

Matamanda,2025-10-04 This book provides an exploration of the geographic dimensions of climate change focusing on both

urban and rural perspectives By examining the unique challenges and opportunities that arise in different environments it

offers a balanced and holistic approach to climate mitigation It demonstrates how geographical analysis may guide and

strengthen efforts to mitigate climate change by bringing together a variety of tactics case studies and research findings

from around the world The main topics covered include urban planning and climate resilience rural land use and

sustainability the role of geographic information systems GIS in climate modeling and the socio economic impacts of climate

policies Special emphasis is placed on the interconnectedness of urban and rural ecosystems recognizing that solutions in

one domain can have ripple effects in the other For instance the book explores how rural land conservation can support

urban carbon sequestration efforts or how sustainable urban design can reduce the pressure on natural rural resources

These topics are crucial as the world faces environmental changes Cities are responsible for the majority of global emissions

yet rural areas often suffer the consequences of climate impacts Understanding the geographic factors influencing both

regions is crucial to developing tailored effective mitigation strategies The book explores the innovative approaches such as

the use of nature based solutions in urban areas or regenerative agriculture in rural settings that offer promising routes for

sustainable development The problem addressed in this book is the lack of a unified geographic perspective on climate

actionable solutions that answer to the needs of diverse communities Climate change is a global issue but its impacts and

solutions are deeply localized understanding these geographic issues is essential for policymakers urban planners landscape
